1. Introduction

Background

The purpose of the Queensland Family and Child Commission (QFCC) is to influence change that improves the safety and wellbeing of Queensland's children, young people and their families. QFCC's vision is that every Queensland child and young person is loved, respected and has their rights upheld.

MCR was commissioned by the QFCC in 2023 to analyse and report the results of a survey of frontline workers in the Queensland statutory systems (child protection and youth justice) (the sector).

Research objectives

The objective of this project was to gather frontline worker perspectives on a range of topics, including:

- child protection and family support and youth justice system performance
- how the workforce is supported
- working with clients and child rights
- cultural capability
- collaboration across the sector
- learning and development.

Similar surveys have been undertaken annually since 2018.

2. Method

The method comprised an online self-completion survey programmed and hosted by Ipsos.

Sampling frame

Participation was sought from government and non-government staff working in the child protection and family support and youth justice sectors across Queensland.

Postcodes were used to categorise the workplace location of respondents by Department of Child Safety, Seniors and Disability Services (DCSSDS) regions (Brisbane and Moreton Bay, Far North Queensland, North Queensland, South East, South West, Sunshine Coast and Central) and Family and Child Connect (FaCC) catchments (see Table 2.3 on pages 7 – 9).

Sample size and characteristics

A total sample of 575 respondents were surveyed. Of the total number of respondents, 292 worked in government agencies (51%) and 283 were from non-government organisations (49%). 81 respondents identified as an Aboriginal and/or Torres Strait Islander person (14%) and 87 were from a culturally and linguistically diverse background (15%).

Responses were received from all regions throughout Queensland (refer to Appendix B for a map showing the location of all regions). The highest proportion of overall responses were received from the Brisbane and Moreton Bay region (37%). The lowest proportion of responses were received from the North Queensland region (5%). In terms of FaCC catchments, the highest proportion of responses was received from Brisbane North (12%) and Cairns (12%), followed by Moreton Bay (10%), Ipswich (9%), Toowoomba and Roma (8%), Brisbane South (8%) or the Gold Coast (7%).

Child protection work history and qualifications

35% of those surveyed in 2023 had 10 or more years of experience working in the sector. The proportion who had worked in the sector for two years or less was 22%, while 23% had worked in the sector for 3 to 5 years and 21% for 6 to 9 years.

46% of respondents had a Bachelor degree as their highest level of tertiary education. 19% held a postgraduate (Masters or PhD) qualification, while 15% had completed a Graduate Certificate/Diploma, 11% had a Diploma or Advanced Diploma and 6% held a Certificate-level qualification.

Most respondents (61%) in 2023 had no supervisory responsibilities. 31% were mid-level managers and 8% of respondents were senior managers or executives.

Types of services and clients

452 respondents primarily worked in the child protection sector (79%) and 50 primarily worked in the youth justice sector (9%). Responses from the 73 respondents who indicated that they mainly worked in 'other' sectors not listed in the response option for this question are displayed in Table 2.1 on the following page.

Child protection was the main service offered by respondents with 41% nominating tertiary services and 20% secondary services. Educational/schools/early education (5%), counselling and other mental health services (4%), health and hospitals (4%), youth justice services (community based) (4%) and domestic and family violence services (4%) were the next most prevalent support services. 3% provided youth justice services (detention or service centre), 1% provided drug and alcohol services and less than 1% provided disability services. Responses from those who indicated that they provided 'other' service/s not listed in the response option for this question are displayed in Table 2.2.

35% of child protection non-government respondents worked for an Intensive Family Support service, 20% worked for a Family Wellbeing Service and 16% worked for a Family and Child Connect service. Approximately two in ten child protection non-government (21%) and youth justice non-government (24%) respondents were employed by an Aboriginal and Torres Strait Islander community controlled organisation.

71% of child protection government respondents reported working in a Child Safety Service Centre or Regional Intake Service.

The majority of respondents indicated working with children and young people living in out-of-home care (74%).

All demographic data is displayed in Table 2.3.

Table 2.1: 'Other' responses for sectors provided by respondents

Q96. Do you work mainly with.. (Other)
Both Child Protection and Youth Justice systems (10 mentions)
Adolescent assessment, referral and brief intervention
Adults (2 mentions)
Adults experiencing domestic violence
Adults experiencing social and emotional wellbeing barriers
All children
AOD Intervention Outcome for Youths 12-25yrs old
Case worker in early intervention family support program
Child and young people - and their families (if applicable) eligible for support through the Department of Home Affairs Unaccompanied Humanitarian Minors Program
Children and families accessing early years education
Children and families in out of home care
Children and young people and their families also experiencing domestic, family and sexual violence
Children and young people and their families not in contact with the child protection but with family support system
Children and young people and their families who are at risk of entering and/or re-entering child protection system
Children and young people in a health setting
Children and young people living in residential and SIL Services
Children and young people with their families
Children with disability or developmental delay - NDIS - Multiple DOCS interventions
Children, young people and their families at risk of entering the child protection system (2 mentions)
Community child health
Corporate role which supports regional service delivery to children and families in contact with the child protection system
Corporate services
Department of Education
Disabilities - which can be youth justice/child safety and community
Domestic and Family Violence
Domestic violence
Early intervention before involvement of child protection
Early intervention - children at risk of entering the CP system
ECEC
Education (3 mentions)
Families and children not in contact with child protection
Families in contact with child protection
Families not involved in child safety
Family Support Department
Family Support Service with families both within and external to the child protections system
Foster Care (2 mentions)
Foster Carers and Foster Children
Funded Services
General education setting - some families have contact with child protection and family support system
Health
Housing
Investments and Partnerships
NGO service providers
Parents in contact with the child protection and family support system
Parents involved in child protection
People impacted or using DFV and their families
Placement Providers
QHealth
School (2 mentions)
School staff in reporting and responding to student protection worries
Service Providers (2 mentions)
Staff who work directly with children and young people in contact with the child protection system and family support system
Students
Vulnerable children and families with high risk complexities
We work with Parents and their children 9mths to 6yrs - some parents are engaged with child safety - not all
Work with Aboriginal &/ Torres Strait Islander women and families who have child safety involvement
Young people in with YJC & CP & no contact with either
Unless noted otherwise, each row indicates a single response from a respondent

Table 2.2: 'Other' responses for services provided by respondents

Q10. Which of the following best describes the main service/s you yourself provide to children, young people and families?
A number of these above programs as a labour force
Administration (6 mentions)
Administrative support
Advocacy (2 mentions)
All of the above (2 mentions)
All of the above to some extent - Overall support
Carer and child support
Case management family support
Case management goal focused linking with many of the above stakeholders
Child and Family Support
Child Protection
Child Protection - Administration Services
Child Protection - children in carer homes
Child Protection - frontline services
Child Protection - training
Child Safety
Children and young people who are eligible for program support
Community programs
Community youth service
Consumer body
Contract and licensing management of providers
Contract management (2 mentions)
Cultural (2 mentions)
Culturally appropriate services - in line with the Aboriginal and Torres Strait Islander Child Placement Principle
Diversionary
Early intervention (2 mentions)
Early Intervention Case Management
Emergency housing for self-placing YP
Family support services (6 mentions)
Family support and early intervention
Family wellbeing support
Finance
Foster care support (2 mentions)
Goal focused case management
Guidance officer
Housing support
Information and referrals
Intake
Intense family support (2 mentions)
Investigations
Legal (3 mentions)
Mandatory reporting in education setting
Monitoring of programs withing Child youth and Family Services
Our program is a support program, we are pre employment and help parents address barriers [to securing employment]
Out of Home Care (4 mentions)
Placement
Placement support for children in OOHC
Police
Residential
Residential and SILS
Residential youth worker
School Based Youth Health Nurse
Support and supervision to families with foster children
Support with systems advocacy
Support work
Systems advocacy
Targeted family support to young parents
Targeted family support, families with children 0-8, secondary
Transition from care
We provide culturally appropriate support for families who have child safety intervention
WHS support
Youth crisis housing
Youth Justice

Unless noted otherwise, each row indicates a single response from a respondent

Beenleigh/Bayside	12	2%
Browns Plains/Beaudesert	10	2%
Cape York/Torres Strait	5	1%

Fieldwork

The fieldwork dates for the survey were 19 May to 12 July 2023.

The survey was promoted through the QFCC's established networks. When the survey launched, government agencies involved in the provision of child protection and family support and youth justice services and non-government service providers were asked to send information about the survey, including the survey link, to staff who met the characteristics of the sampling frame. Peak bodies representing non-government service providers were asked to promote the survey to their membership and in their newsletters. Additionally, promotion through the QFCC's LinkedIn account was also undertaken. Respondents to the 2022 survey who provided their email addresses received direct invitations to participate, and a reminder email halfway through the data collection period.

Questionnaire

The survey consisted of 101 questions that were predominantly rating style involving a pre-defined codeframe for respondents to select from or to indicate their agreement with. A total of 5 open-ended questions were included so both qualitative and quantitative data could be collected, as well as one question that sought numeric information (e.g. in the form of the respondent's workplace postcode) and was subsequently coded into regions in Queensland. The 5 open-ended questions provided an opportunity for respondents to answer in their own words using an open-ended response format. These responses were subsequently coded into key themes for analysis. In the case of 5 questions, the option was provided for respondents to provide a free text response under 'other' at the end of a pre-defined codeframe.

The questionnaire requested basic demographic information to allow stratified analysis of key sub-groups (e.g. organisation type, region, years worked in the child protection and family support or youth justice sector, role type). Questions covered a broad range of topics relevant to the child protection reform program (e.g. system performance, workforce support, working with clients and child rights, cultural capability, collaboration and learning and development).

A copy of the questionnaire can be found at Appendix A. While most questions were presented to all respondents, responses were not mandatory. The base or total number of respondents reported for each question varies because the base reflects only those who elected to answer the question.

Ethics

Informed consent information was included on the front page of the survey and completion of the survey was taken to imply that participants had consented to take part in the research.

Data analysis

At the completion of the fieldwork, the survey results were analysed using Q Research Software. The analysis took the form of frequency counts for each question and cross analysis of responses to all questions by selected demographic and behavioural factors (cross tabulations). In the data analysis stage, all survey data were subjected to tests of significance for each survey question. Z-tests were applied to all frequency counts (in the tables in this report, red and blue indicate a difference at the 95% confidence level of that group compared to others in that category, e.g. child protection workers compared to youth justice workers). The average calculation is based on the responses of all respondents to a question. It should be noted that where a key result differs significantly from the average (and is referred to in the report's commentary), it is not necessarily the group with the highest or lowest percentage. Small cell sizes mean sometimes there is a group with a higher or lower percentage; however, this does not differ significantly from the average after taking sampling error into account. Blank cells in tables indicate 0%.

Weighting

The data have not been weighted.

Comparison of samples across survey years

A number of differences are evident in the profile of the 2022 sample compared with the sample collected in 2021. The 2022 sample contains:

- a higher proportion of respondents working for government organisations (51% in 2023, 30% in 2022) and fewer non-government respondents (49% in 2023, 70% in 2022)
- fewer respondents with experience of 10-14 years (12% in 2023, 18% in 2022)
- more respondents from the Brisbane and Moreton Bay DCSSDS region (37% in 2023, 30% in 2022) and fewer from the North QLD (5% in 2023, 11% in 2022) and Sunshine Coast + Central DCSSDS regions (14% in 2023, 23% in 2022)
- a higher proportion who have only worked in government agencies (27% in 2023, 18% in 2022) or have mostly worked in government agencies (18% in 2023, 13% in 2022) and a lower proportion of respondents who have only worked in non-government organisations (21% in 2023, 34% in 2022).

Table 2.4: Key sample characteristics 2023 compared to previous survey data⁺

YEAR					
Q13: Is your workplace a government or non-government organisation?					
	2019 n = 277	2020 n = 761	2021 n = 762	2022 n = 481	2023 n=575
Government	56%	54%	57%	30%↓	51%↑
Non-government	44%	46%	43%	70%↑	49%↓
Q1: How long have you worked in one of the statutory systems (child protection or youth justice) sector?					
	2019 n = 281	2020 n = 759	2021 n = 762	2022 n = 480	2023 n=570
Less than 1 year	7%	7%	5%	8%	10%
1–2 years	12%	10%	8%	12%	12%
3–5 years	15%	22%↑	19%	24%	23%
6–9 years	19%	15%	16%	16%	21%
10–14 years	25%	21%	18%	18%	12%↓
15–19 years	12%	12%	15%	11%	11%
20+ years	11%	13%	19%↑	11%↓	12%
DCSSDS Region					
	2019*	2020*	2021 n = 763	2022 n = 481	2023 n=575
Brisbane + Moreton Bay	-	-	30%	30%	37%↑
Far North QLD	-	-	8%	9%	13%
North QLD	-	-	9%	11%	5%↓
South East	-	-	19%	10%↓	15%
South West	-	-	15%	17%	16%
Sunshine Coast + Central	-	-	19%	23%	14%↓
Q7: At which level do you work in your organisation?					
	2019 n = 276	2020 n = 761	2021 n = 762	2022 n = 479	2023 n=575
No supervisory responsibilities	56%↑	61%	55%	62%	61%
Mid-level manager	34%	33%	39%	30%↓	31%
Senior manager/executive	10%	6%	6%	9%	8%
Q31: How would you describe your experience in the relevant statutory system (child protection or youth justice) sector?					
	2019*	2020 n=759	2021 n = 763	2022 n = 480	2023 n=574
I have only worked in government agencies	-	32%	41%↑	18%↓	27%↑
I have mostly worked in government agencies	-	13%	12%	13%	18%↑
I have fairly equal experience in government agencies and non-government organisations	-	19%	16%	16%	17%
I have only worked in non-government organisations	-	22%	18%	34%↑	21%↓
I have mostly worked in non-government organisations	-	14%	13%	19%↑	17%

⁺ Data for 2019 to 2021 only includes Child Protection (CP) workers. Data for 2022 and 2023 includes Youth Justice (YJ) along with Child Protection (CP) workers (2022: 431 CP + 50 YJ; 2023: 452 CP + 50 YJ)

Blue↑/Red↓ indicates a significant increase or decrease from the previous year at at least the 95% confidence level. * Postcodes were used to code regions in 2019 and 2020; however, the regions for Child Safety changed following Machinery-of-Government changes and are not comparable. # Question not asked in 2019.

Limitations

Comparisons of responses across survey years should be interpreted with caution given the changes in the sample characteristics described in Table 2.4. In previous surveys (and in 2023), non-government respondents were often more positive than government-based respondents. Increases in negative responses in 2023 may therefore be, at least in part, due to the increased proportion of government respondents, rather than change across the sector.

In 2023, this report includes data collected from both child protection and youth justice workers. In 2022, data was collected from these two groups however it was reported in two separate reports. Where available, the 2022 data from both the child protection and youth justice studies have been combined to provide a new overall total for 2022. Any data shown for 2018 – 2021 is only based on data collected among child protection workers, youth justice workers were not surveyed during this time.

The survey population could not be calculated because the survey was forwarded to an unknown number of individuals. All surveys are subject to multiple sources of error which are most often not possible to quantify or estimate, including sampling error, coverage error, error associated with non-response, error associated with question wording and response options. Appendix C contains a table that details the level of sampling error associated with various cell sizes for this survey (at the 95% confidence level).

(Top mentions)**

Child Protection & Family Support System

35% - Greater support for workforce ▲

26% - Employ more people

23% - Increased funding ▼

20% - Support to meet service gaps ▲

19% - Better working environment ▲

Youth Justice System

20% - Expand early intervention services

19% - Additional funding / resources

17% - Greater participation in community / more community support

14% - More social opportunities / culturally based programs

13% - Increased family support

Arrows indicate a statistically significant change from 2022 results.

3. Findings

3.1 About the workforce

Q5 I would recommend working in the relevant statutory system (child protection or youth justice) sector to others

3.1.1 2023 result

38% of respondents reported that they would recommend working in the child protection or youth justice sector to others. 31% would not recommend working in these sectors to others and the same proportion 31% considered themselves to be neutral on this issue.

Figure 3.1.1: Recommendation of working in the relevant statutory system (child protection or youth justice) sector (2023)

3.1.2 Comparison to previous survey data (2019–2022)

The proportion of respondents likely to recommend working in the child protection or youth justice sectors in 2023 (38%) was significantly lower than in 2022 (49%).

Figure 3.1.2: Recommendation of working in the relevant statutory system (child protection or youth justice) sector 2019–2023 trend⁺

⁺ Data for 2019 to 2021 only includes Child Protection (CP) workers. Data for 2022 and 2023 includes Youth Justice (YJ) along with Child Protection (CP) workers
↑↓ indicates a significant increase or decrease from the previous wave at at least the 95% confidence level.

3.1.3 Sub-group differences (2023)

Likelihood to recommend the sector was higher among those working in the youth justice area (58% agreed or strongly agreed they would recommend, 10% disagreed or strongly disagreed) than among child protection workers (37% agreed or strongly agreed they would recommend, 33% disagreed or strongly disagreed).

Table 3.1.1: Recommendation of working in the relevant statutory system (child protection or youth justice) sector by organisation type, region and years in sector (2023)

Q32 I intend to leave the sector within the next 12 months

3.1.4 2023 result

61% of respondents reported that they did not intend to leave the child protection or youth justice sector within the next 12 months. 19% of respondents reported an intention to leave their respective sector within the next 12 months, while 20% provided a neutral response to this question.

Figure 3.1.3: Intention to leave the sector within the next 12 months (2023)

3.1.5 Comparison to previous survey data (2020–2023)

The proportion showing an intention to leave the child protection or youth justice sectors was significantly higher in 2023 (19%) compared to the reported intention to leave in 2022 (12%).

Figure 3.1.4: Intention to leave the sector 2020–2023 trend⁺

3.2 Statutory systems (child protection and youth justice)

Q26b Thinking about *statutory systems (child protection or youth justice)* as a whole, how much do you agree or disagree the child protection and family support system meets the needs of children, young people and families?

3.2.1 2023 result

Respondents were asked their opinion as to whether the child protection and family support system meets the needs of children, young people and families. 14% of respondents working in the child protection or youth justice sectors agreed or strongly agreed with this statement. In total 65% of respondents disagreed with this statement (22% strongly disagreed, 43% disagreed). The remainder (21%) were neutral.

Figure 3.2.1: Agreement with the system meeting the needs of children, young people and families (2023)

3.2.2 Comparison to previous survey data (2019–2023)

The survey result in 2023 (14%) was consistent with both the 2022 survey (16%) and the 2021 survey (12%).

Figure 3.2.2: Agreement with the system meeting the needs of children, young people and families 2019–2023 trends⁺

⁺ Data for 2019 to 2022 only includes Child Protection (CP) workers. Data for 2023 includes Youth Justice (YJ) along with Child Protection (CP) workers
 ↑↓ indicates a significant increase or decrease from the previous wave at at least the 95% confidence level.

3.2.3 Sub-group differences (2023)

Those working in a non-government organisation (70%), those who have worked in the sector for 10 years or longer (71%) or those who identify as culturally or linguistically diverse (71%) were more likely than their counterparts (average 65%) to disagree or disagree strongly that the system meets the needs of children, young people and families.

Q26c Thinking about **statutory systems (child protection or youth justice) as a whole**, how much do you agree or disagree the statutory system I work in (child protection or youth justice) is built on shared connections and commitment

3.2.4 2023 result

41% of respondents working in the child protection or youth justice sectors agreed or strongly agreed the system they work in is built on shared connections and commitment with 36% agreeing and 6% strongly agreeing with this statement. 34% disagreed or strongly disagreed the systems they work within are built on shared connections and commitment. The remainder were neutral on this issue (24%).

Figure 3.2.3: Agreement with statement on shared connections and commitment (2023)

3.2.5 Comparison to previous survey data (2019–2023)

The survey result in 2023 (41%) was consistent with the 2022 survey (44%) on total agreement that the child protection and youth justice systems are built on shared connections and commitment.

Figure 3.2.4: Agreement with statement on shared connections and commitment 2019–2023 trends⁺

⁺ Data for 2019 to 2021 only includes Child Protection (CP) workers. Data for 2022 and 2023 includes Youth Justice (YJ) along with Child Protection (CP) workers

Q26e/i Thinking about **statutory systems (child protection or youth justice) as a whole**, how much do you agree or disagree with the following?

e) The community actually has confidence in the child protection and family support system

New in 2023

i) The community should have confidence in the child protection and family support system

3.2.7 2023 result

Respondents were asked whether they perceive that the community has confidence in the child protection and family support system. 4% of respondents agreed that the community has confidence in the system with 85% disagreeing (44% disagreed, 41% strongly disagreed).

Additionally in the 2023 survey, a new question was asked as to whether respondents thought the community should have confidence in the child protection and family support systems. A total of 54% of respondents agreed (31% agreed, 23% strongly agreed) that the community should have confidence in these systems. 26% disagreed while the remaining 20% were neutral regarding this statement.

Figure 3.2.5: Agreement with statement on community confidence in the child protection and family support system (2023)

3.2.8 Comparison to previous survey data (2019–2022)

Total agreement that 'the community has confidence in the system' (4%) was stable against the last two years' results in contrast to higher levels of total agreement noted in 2019 (8%) and 2020 (14%). However, compared with 2022, fewer respondents were neutral (10% in 2023, 22% in 2022) and more respondents disagreed (85% in 2023, 71% in 2022) with this statement.

Figure 3.2.6: Agreement with statement on community confidence in the child protection and family support system 2019–2023 trends⁺

⁺ Data for 2019 to 2021 only includes Child Protection (CP) workers. Data for 2022 and 2023 includes Youth Justice (YJ) along with Child Protection (CP) workers
 ↑↓ indicates a significant increase or decrease from the previous wave at at least the 95% confidence level.

3.2.9 Sub-group differences (2023)

Those employed by a non-government agency (88%) were more likely than their government counterparts to agree or strongly agree that the community has confidence in the child protection and family support system.

Government based respondents were more likely to agree or strongly agree that the community should have confidence in the child protection and family support system (61%) compared to respondents working for non-government entities (47%).

New question in 2023

Q26h Thinking about **statutory systems (child protection or youth justice) as a whole**, how much do you agree or disagree the youth justice system meets the needs of young people, families and the community?

3.2.10 2023 result

Respondents were asked their opinion as to whether the youth justice system meets the needs of children, young people and families. A total of 7% of respondents working in either the child protection or youth justice sectors agreed or strongly agreed with this statement. 63% of respondents disagreed with this statement (25% strongly disagreed, 38% disagreed). The remainder (30%) were neutral.

Figure 3.2.7: Agreement with the youth justice system meeting the needs of children, young people and families (2023)

3.2.11 Sub-group differences (2023)

Those working in the youth justice sector (16%) were more likely than those working in the child protection sector (6%) to agree or strongly agree that the youth justice system is meeting the needs of children, young people and families. Non-government workers (68%) were more likely than their government counterparts (58%) to disagree or disagree strongly with this statement.

New questions in 2023

Q26j/k Thinking about **statutory systems (child protection or youth justice) as a whole**, how much do you agree or disagree with the following?

j) The community actually has confidence in the youth justice system

k) The community should have confidence in the youth justice system

3.2.12 2023 result

New in 2023, respondents were asked whether they perceive that the community has confidence in the youth justice system. 3% of respondents agreed that the community has confidence in the system while 81% disagreed (34% disagreed, 48% strongly disagreed).

Respondents were also asked as to whether they thought the community should have confidence in the youth justice system. A total of 49% of respondents agreed (27% agreed, 22% strongly agreed) that the community should have confidence in this system. Around one quarter (26%) of respondents disagreed that the community should have confidence in the youth justice system with 9% strongly disagreeing and 16% disagreeing. 26% were neutral regarding this statement.

Figure 3.2.8: Agreement with statement on community confidence in the child protection and family support system (2023)

3.2.13 Sub-group differences (2023)

Respondents working in the youth justice system (46%) or those who had worked in the industry for 10 or more years (32%) were more likely than their counterparts (child protection sector workers 24% agreed, <10 years services 24%) to agree that the community should have confidence in the youth justice system.

Q26 Thinking about **the statutory systems (child protection or youth justice) as a whole**, how much do you agree or disagree with the following?

f) There is sufficient capacity within the secondary support service system I work in (child protection or youth justice) to meet demand

g) There is sufficient capacity within the tertiary support system I work in (child protection or youth justice) to meet demand

Q57 Family support referrals and child protection reports are likely to increase in the next 12 months.

New question in 2023:

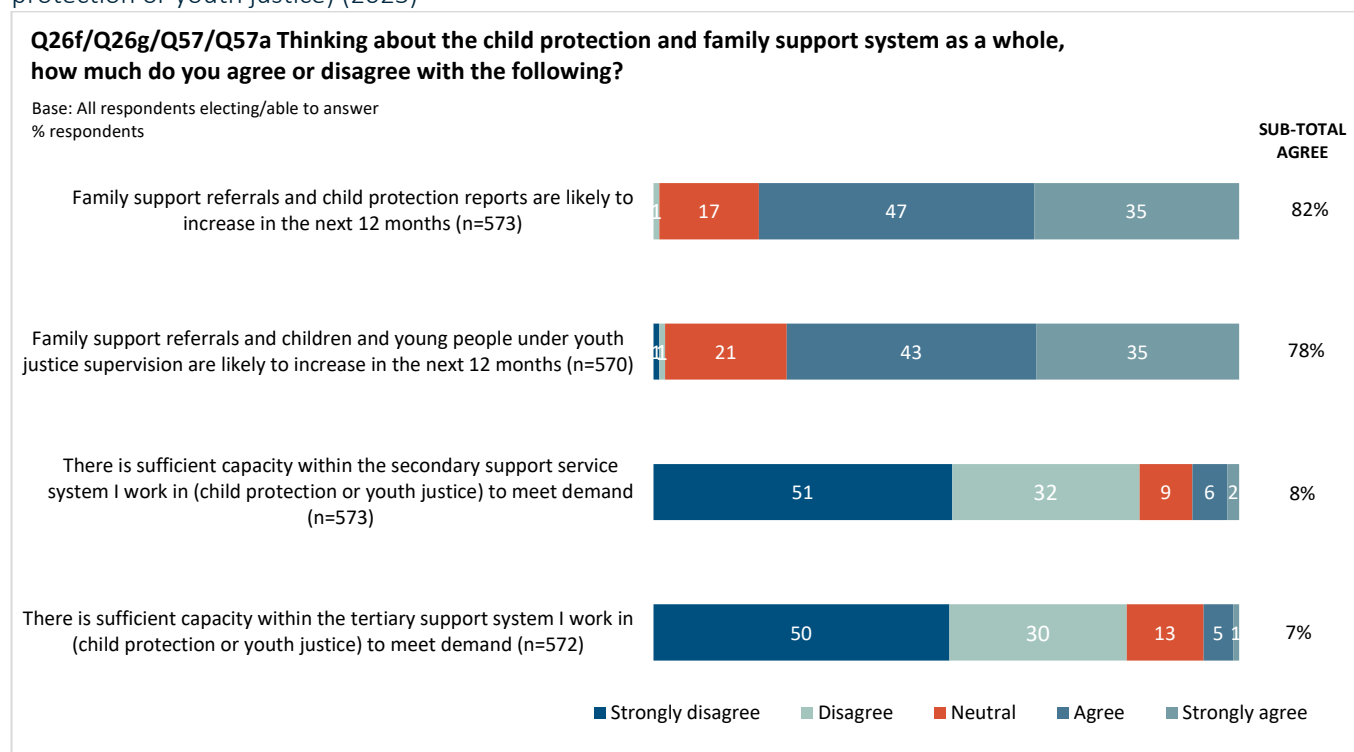

Q57a Family support referrals and children and young people under youth justice supervision are likely to increase in the next 12 months

3.2.14 2023 result

The majority of respondents (82%) agreed or strongly agreed that family support referrals and child protection reports are likely to increase in the next 12 months. 35% strongly agreed with this statement, only 1% disagreed or strongly disagreed, while 17% were neutral. Similarly, the majority of respondents (78%) agreed that family support referrals and children and young people under youth justice supervision are likely to increase in the next 12 months. Only 1% disagreed or strongly disagreed with this statement.

When asked about the current capacity within the sector, the majority of respondents disagreed or strongly disagreed there is sufficient capacity either within the secondary support service system (83%) or within the tertiary system (80% disagreed or strongly disagreed) to meet demand.

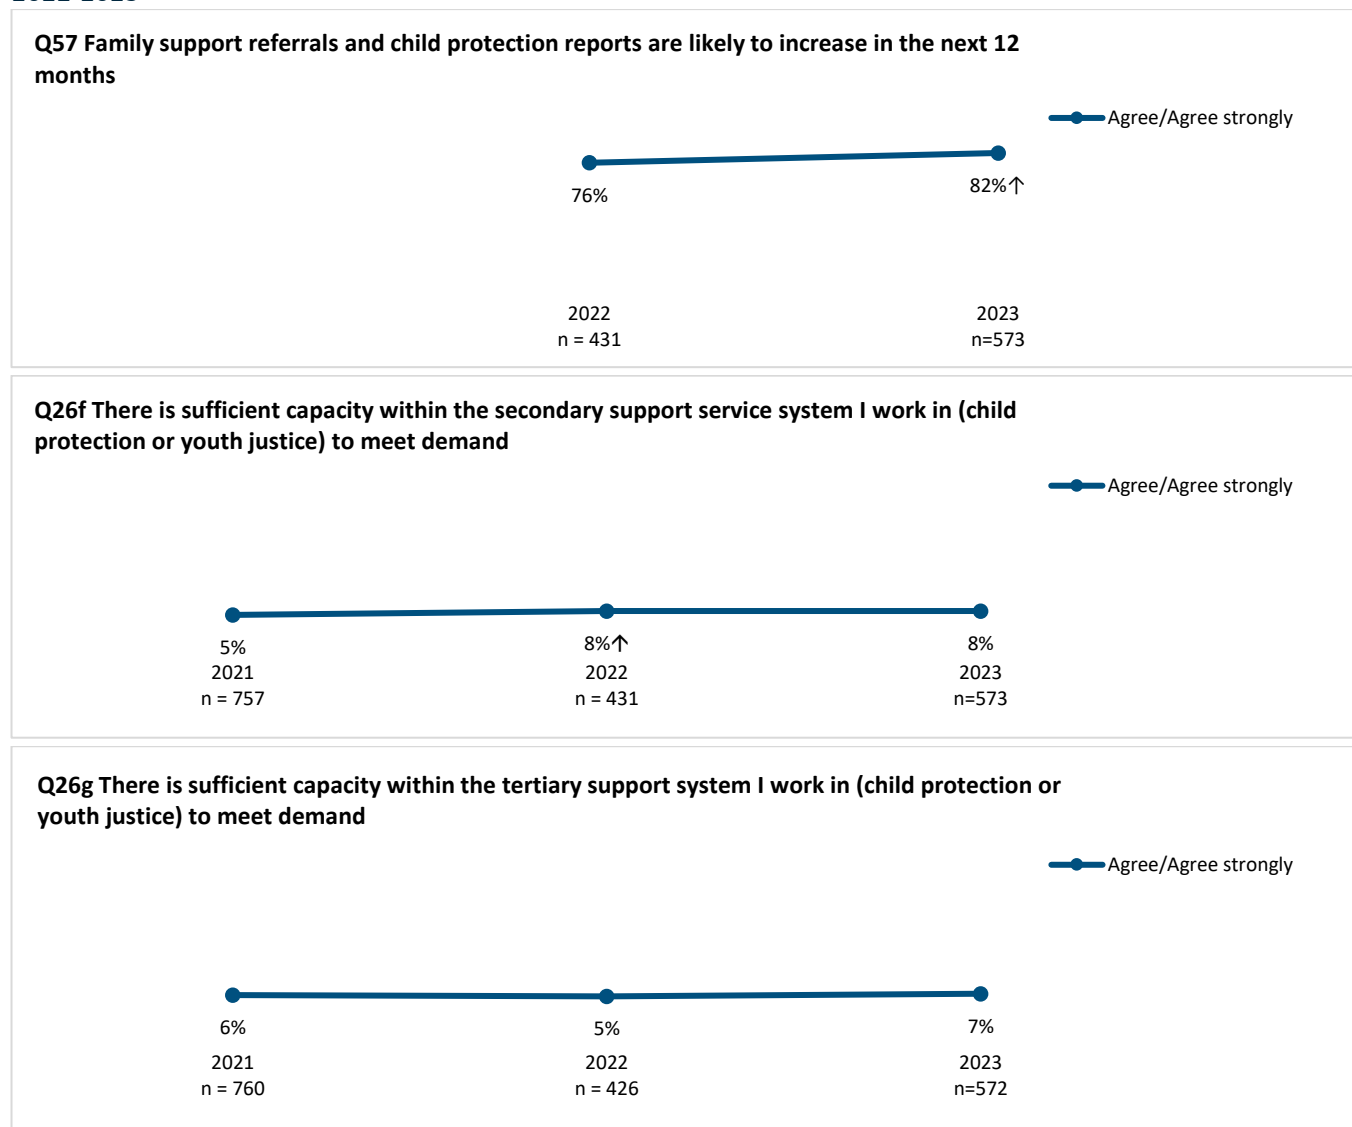

Figure 3.2.9: Agreement with statements on expected demand and current capacity of the statutory systems (child protection or youth justice) (2023)

3.2.15 Comparison to previous survey data (2021–2023)

Opinions among respondents regarding capacity within the secondary and tertiary support systems were consistent from 2022 to 2023. However, an increase in agreement was noted regarding the view that family support referrals and child protection reports are likely to increase in the next 12 months (76% in 2022, 82% in 2023).

Figure 3.2.10: Agreement with statements on capacity of the statutory systems (child protection or youth justice) 2022–2023⁺

⁺ Data for 2021 and 2022 only includes Child Protection (CP) workers. Data for 2023 includes Youth Justice (YJ) along with Child Protection (CP) workers
 ↑↓ indicates a significant increase or decrease from the previous wave at at least the 95% confidence level.

3.2.16 Sub-group differences (2023)

Views regarding capacity in the secondary and tertiary support systems showed some differences by sub-groups of respondents. Respondents working in a senior or middle management role or those who have worked in the industry for 10 or more years were more likely than their counterparts to disagree or strongly disagree that the secondary (90% senior/middle manager, 88% 10+ years) or the tertiary (86% senior/middle manager, 85% 10+ years) support systems have sufficient capacity to meet demand.

Youth justice sector employees were more likely to agree there is sufficient capacity within the tertiary support system to meet demand (16% agreed or strongly agreed) than child protection employees (6%).

Those working in the child protection sector (83%) were more likely than youth justice workers (70%) to agree or strongly agree that family support referrals and child protection reports are likely to increase in the next 12 months. Higher agreement was also registered by those who have worked in the industry for 10 or more years (88%, 79% among <10 years).

Respondents who identify as Aboriginal and/or Torres Strait Islander or those who identify as culturally and linguistically diverse were more likely than other sub-groups to be neutral in many instances.

The reader is referred to Tables 3.2.11 and 3.2.12 for other sub-group differences.

Q33 How much do you agree or disagree with the following?

a) The introduction of Family and Child Connect has resulted in families being more appropriately referred to the secondary or tertiary system

3.2.17 2023 result

41% of respondents agreed or strongly agreed that Family and Child Connect has resulted in families being more appropriately referred to the secondary or tertiary system. A similar proportion (41%) provided a neutral response while 17% disagreed or strongly disagreed.

Figure 3.2.11: Introduction of Family and Child Connect (2023)

3.2.18 Comparison to previous survey data (2020 -2023)

Agreement (agreed or strongly agreed) that Family and Child Connect has resulted in families being more appropriately referred to the secondary and tertiary systems was stable in 2023 (41%) against agreement levels reported in 2022 (42%).

Figure 3.2.12: Introduction of Family and Child Connect 2020-2023 trends⁺

⁺ Data for 2020 and 2022 only includes Child Protection (CP) workers. Data for 2023 includes Youth Justice (YJ) along with Child Protection (CP) workers
↑↓ indicates a significant increase or decrease from the previous wave at at least the 95% confidence level.

3.2.19 Sub-group differences (2023)

Respondents who have worked in either the child protection or youth justice sectors for 10 or more years (23%) or those in senior or middle management (22%) were more likely than their counterparts to disagree or disagree strongly that the introduction of Family and Child Connect has resulted in families being more appropriately referred to the secondary or tertiary system (<10 years of experience 14%, non-supervisory role 15%).

Q33 How much do you agree or disagree with the following?

b) The introduction of Intensive Family Support and Family Wellbeing Services has resulted in:

- i. Improved access to early intervention services for children, young people and families
- ii. A reduction in demand (i.e., less children entering the child protection system)
- iii. Improved outcomes for children, young people and families
- iv. Improved ability of families to care for their children

3.2.20 2023 result

Respondents were asked to rate their agreement regarding outcomes of the introduction of Intensive Family Support and Family Wellbeing Services.

57% of respondents agreed or strongly agreed that the introduction of Intensive Family Support and Family Wellbeing Services has improved access to early intervention services. 47% agreed or strongly agreed that introduction of services improved outcomes for children, young people and families, while 45% of respondents agreed or strongly agreed the introduction of services improved the ability of families to care for their children. There was lower agreement about the introduction of services providing a reduction in demand (19% agreed, 2% strongly agreed) with 50% of respondents disagreeing or strongly disagreeing.

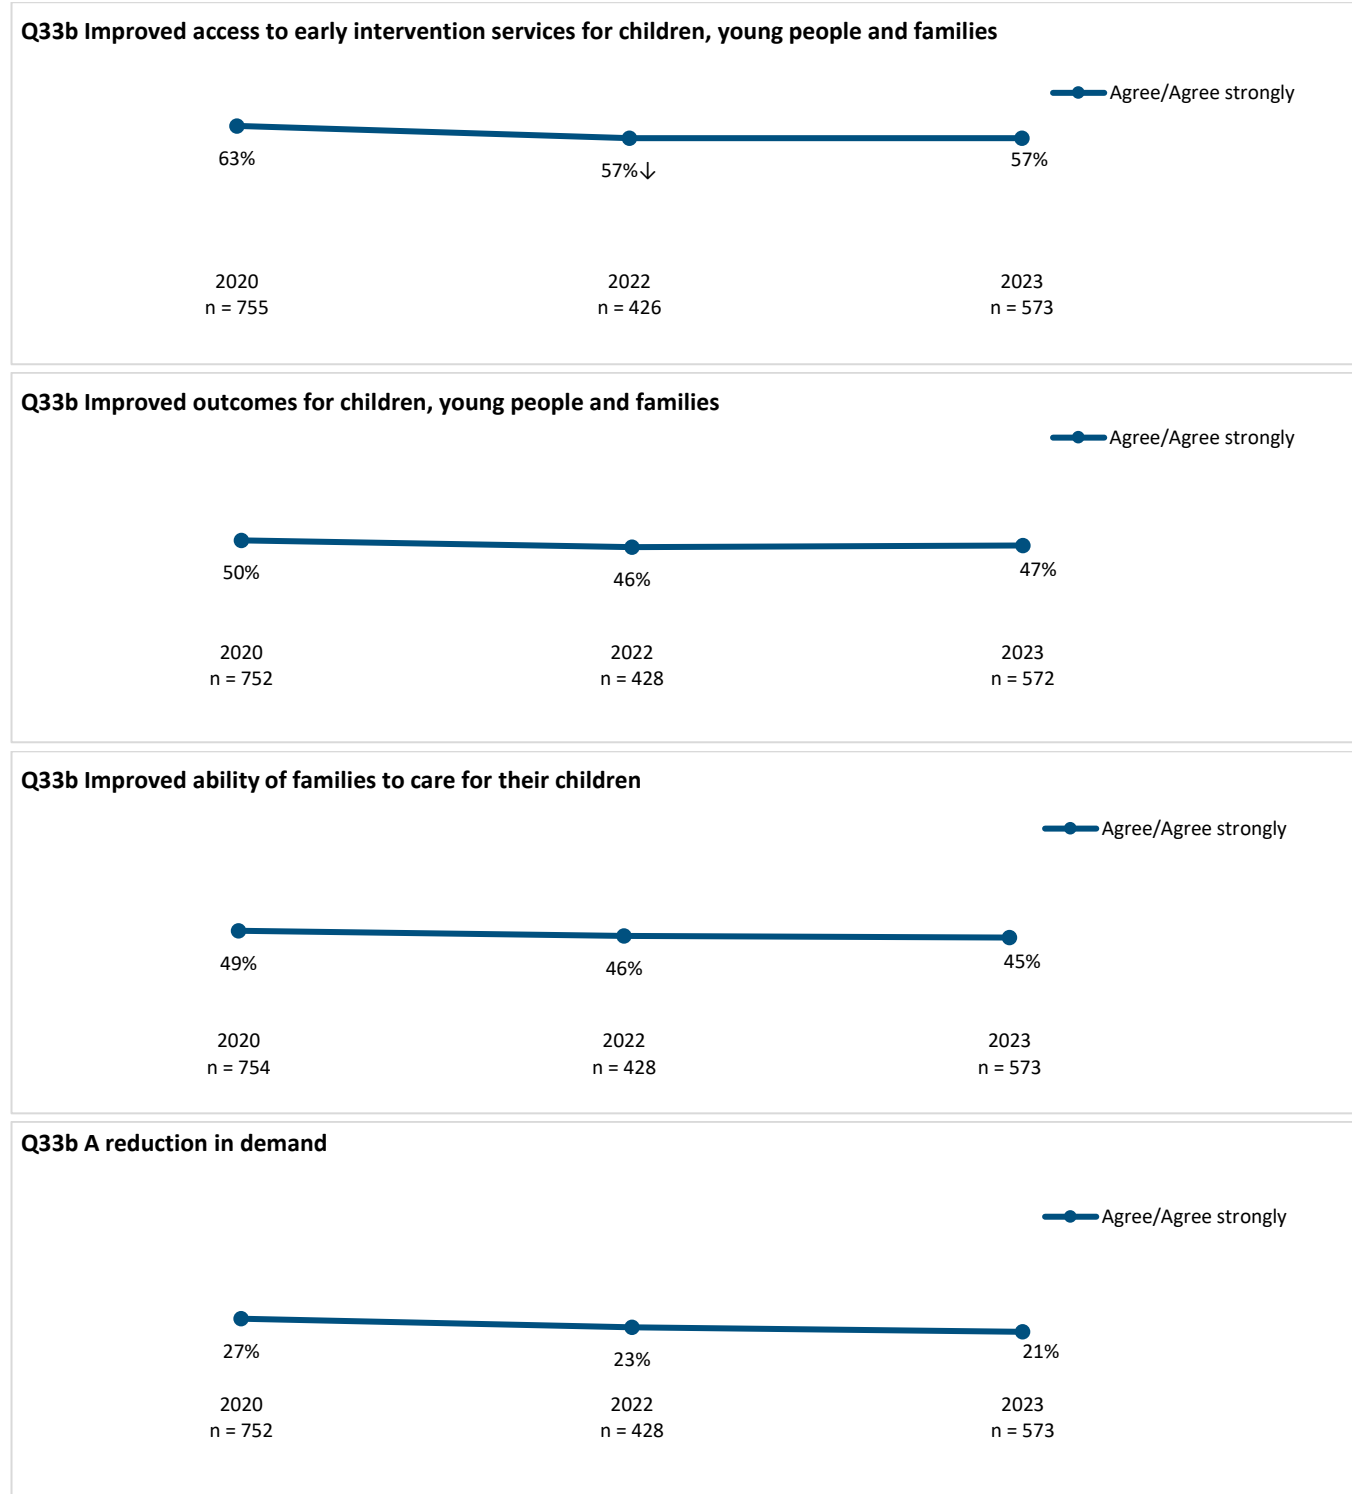

Figure 3.2.13: Introduction of Intensive Family Support and Family Wellbeing Services (2023)

3.2.21 Comparison to previous survey data (2020 - 2023)

Opinions regarding the impact of Intensive Family Support and Family Wellbeing Services were consistent from 2022 to 2023.

Figure 3.2.14: Introduction of Intensive Family Support and Family Wellbeing services 2020-2023 trends⁺

⁺ Data for 2020 and 2022 only includes Child Protection (CP) workers. Data for 2023 includes Youth Justice (YJ) along with Child Protection (CP) workers
 ↑↓ indicates a significant increase or decrease from the previous wave at at least the 95% confidence level.

3.2.22 Sub-group differences (2023)

Respondents with 10 or more years of experience in either the child protection or youth justice sectors were generally more likely to disagree or strongly disagree that the introduction of Intensive Family Support and Family Wellbeing had improved access, outcomes, or family ability or that it had decreased demand.

The reader is referred to Tables 3.2.15 and 3.2.16 for other sub-group differences.

Q39 In your opinion, what could be done to improve the child protection and family support system?

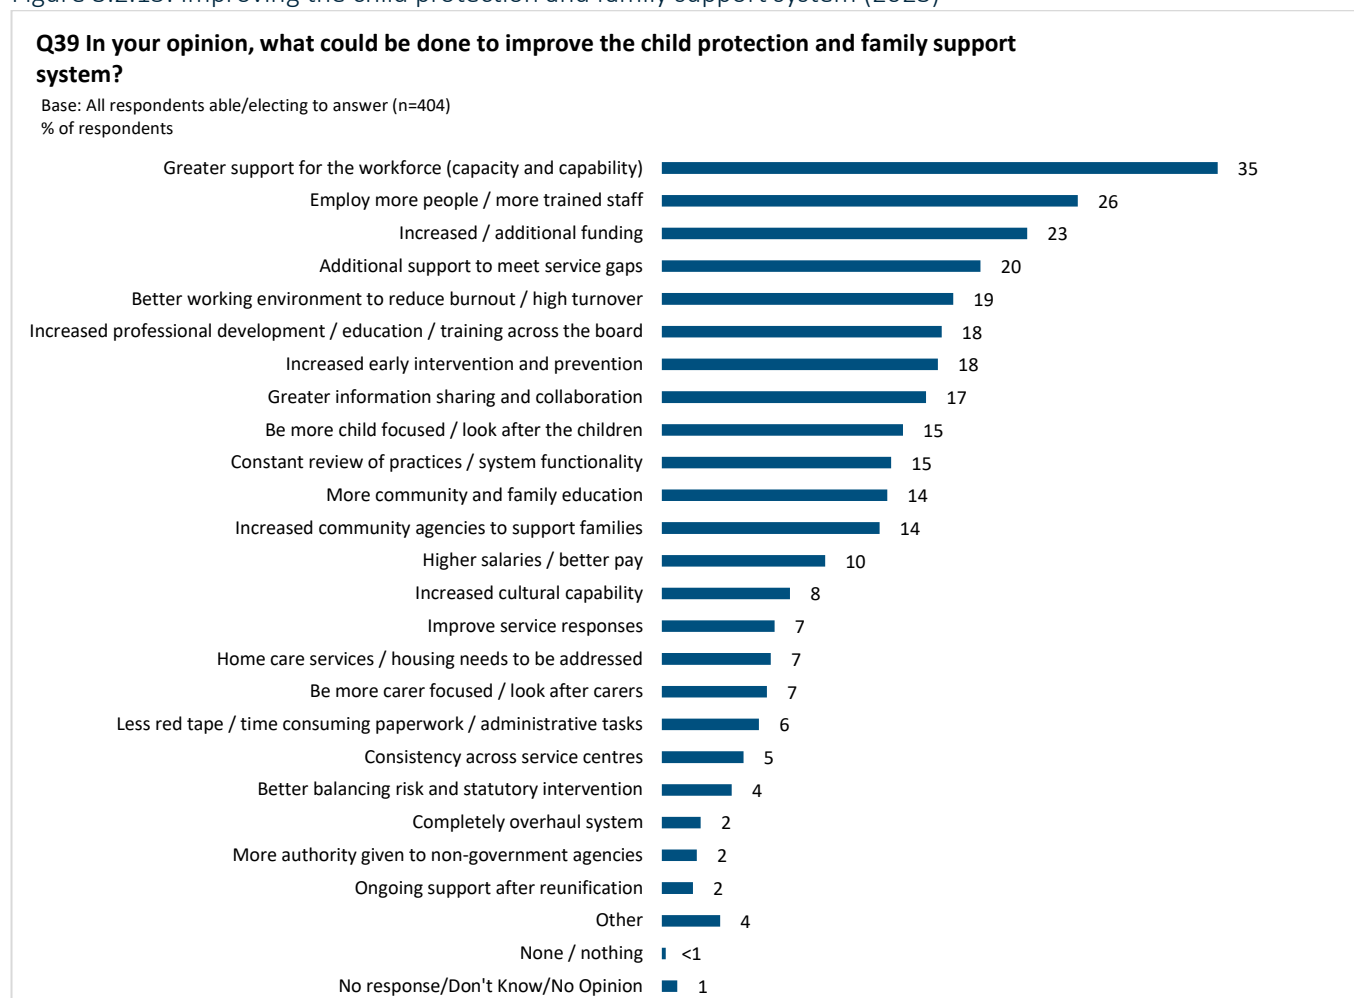

3.2.23 2023 result

When given the opportunity to express, in their own words, what could be done to improve the child protection and family support system, the most common suggestion was to provide greater support for the workforce (capacity and capability) (35%) or employ more trained staff (26%). The next most common suggestions were to increase funding (23%) and provide additional support to meet service gaps (20%).

Other aspects suggested to improve the system included providing a better working environment in order to reduce burnout and turnover (19%), increasing professional development, education and training (18%), increasing early intervention and prevention measures (18%) and more information sharing and collaboration (17%).

Other suggestions are included in Figure 3.2.15 below.

Figure 3.2.15: Improving the child protection and family support system (2023)

3.2.24 Comparison to previous survey data (2022–2023)

Compared with 2022, an increase in the following suggestions about what could be done to improve the child protection and family support system were found in 2023 (refer to Figure 3.2.16):

- greater support for the workforce (capacity and capability) (17% in 2022, 35% in 2023)
- additional support to meet service gaps (8% in 2022, 20% in 2023)
- better working environment to reduce burnout / high turnover (11% in 2022, 19% in 2023)
- be more child focused / look after the children (7% in 2022, 15% in 2023)
- more community and family education (2% in 2022, 14% in 2023).

Calls for increased / additional funding decreased between 2022 and 2023 (30% in 2022, 23% in 2023).

Figure 3.2.16: Improving the child protection and family support system 2022–2023 trends

↑↓ indicates a significant increase or decrease from the previous wave at at least the 95% confidence level.

3.2.25 Sub-group differences (2023)

Government employees (23%) were more likely than non-government staff (14%) to suggest a better working environment to reduce burnout and turnover. Non-government workers (22%) were more likely than their government counterparts (12%) to suggest greater information sharing and collaboration. Respondents who identify as an Aboriginal and/or Torres Strait Islander person were significantly more likely to recommend that increased cultural capability (36%) would improve the child protection and family support system compared to other respondents (4%).

The reader is referred to Tables 3.2.17 and 3.2.18 below.

New question in 2023

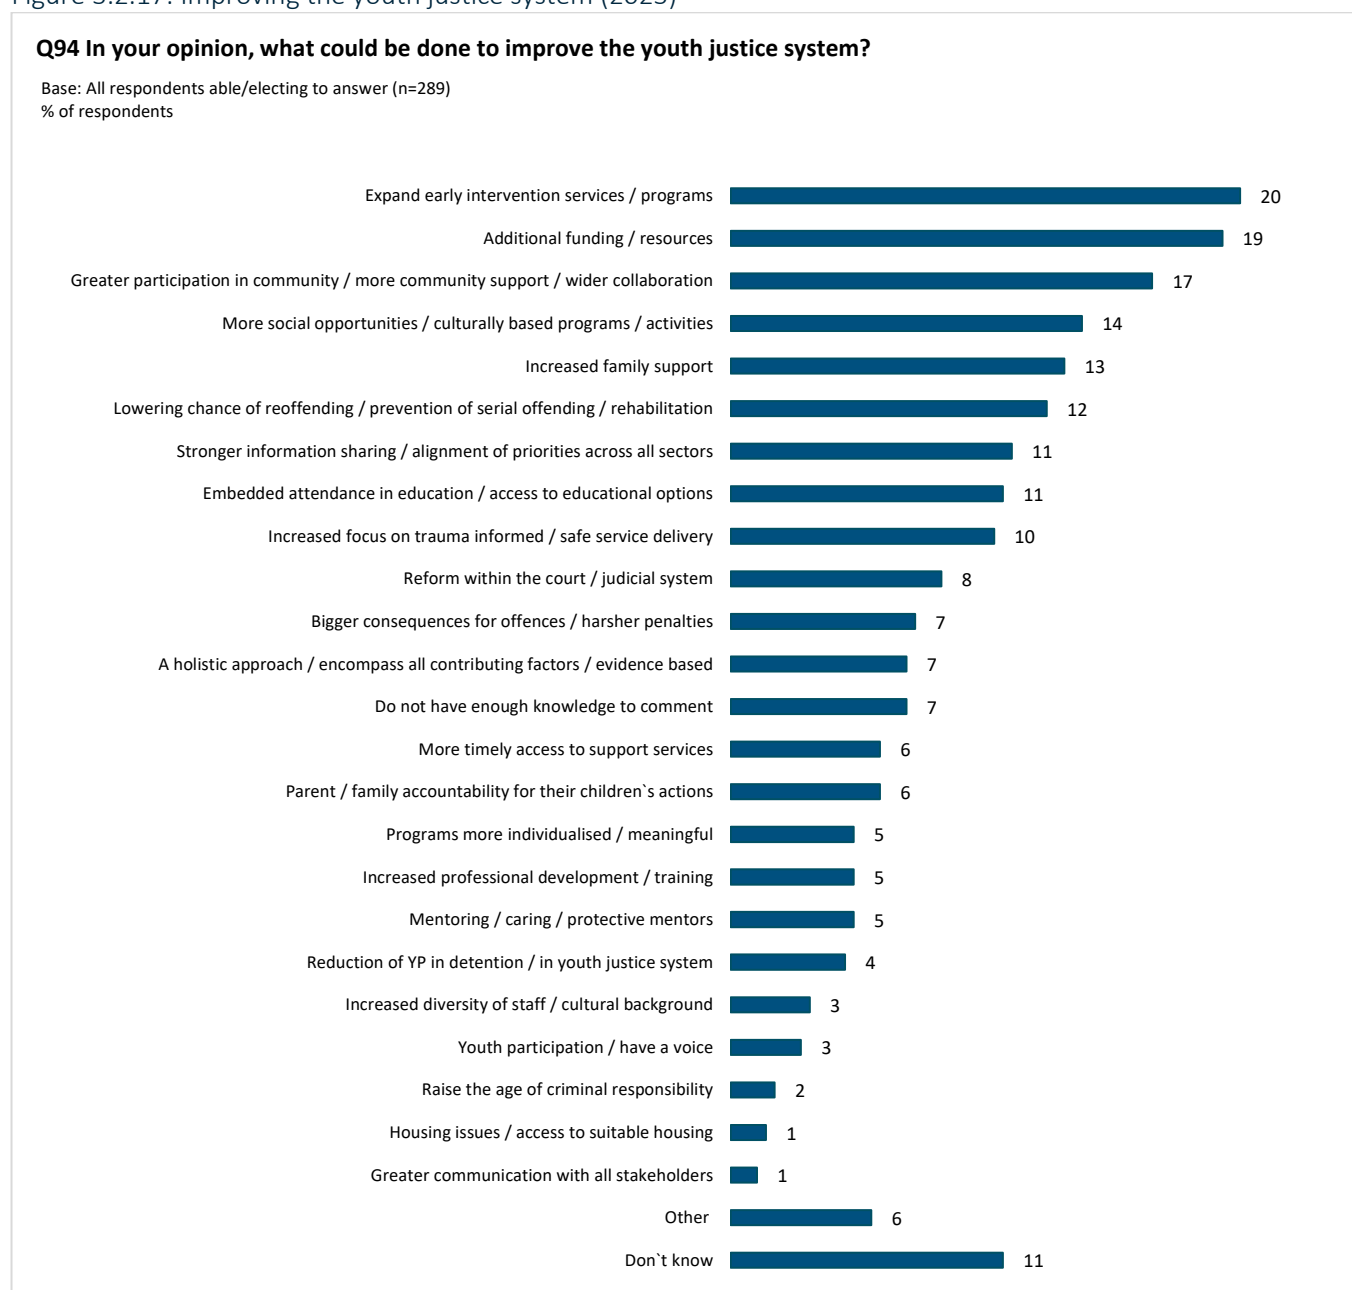

Q94 In your opinion, what could be done to improve the youth justice system?

3.2.26 2023 result

When given the opportunity to express, in their own words, what could be done to improve the youth justice system, the most common suggestions were to expand early intervention services / programs (20%) and to provide additional funding / resources (19%). The next most common suggestions were to have greater participation in the community / more community support / wider collaboration (17%), more social opportunities/ culturally based programs / activities (14%) and increased family support (13%).

Other suggestions are included in Figure 3.2.17 below.

Figure 3.2.17: Improving the youth justice system (2023)

3.2.27 Sub-group differences (2023)

Those working in the youth justice sector were more likely than those in the child protection area to suggest more community support (35% youth justice, 14% child protection), stronger information sharing on practices / better alignment of priorities across sectors (26%, 9% child protection) and increased diversity of staff (13%, 2% child protection).

Other differences are highlighted in Tables 3.2.19 and 3.2.20 below.

Table 3.2.19: Improving the youth justice system by organisation type, region and years in sector (2023)

3.3 About my role

Q15a I have a clear understanding of my role and responsibilities

Q15b I consider my caseload/workload to be manageable

Q15c I am able to spend enough time with children, young people and their families to do my job well

New question in 2023:

Q15g Risk assessment in holding higher than manageable caseload/workload is undertaken adequately

3.3.1 2023 result

The vast majority of respondents agreed or strongly agreed (92%) they have a clear understanding of their role and responsibilities with 48% strongly agreeing with this statement. Only 4% disagreed or strongly disagreed, while 4% were neutral.

47% considered their caseload or workload to be manageable; however, a similar proportion (50%) disagreed or strongly disagreed that they are able to spend enough time with children, young people and their families to do their job well. 31% indicated that a risk assessment in holding higher than manageable caseload / workload is undertaken adequately, however 49% disagreed or strongly disagreed with this.

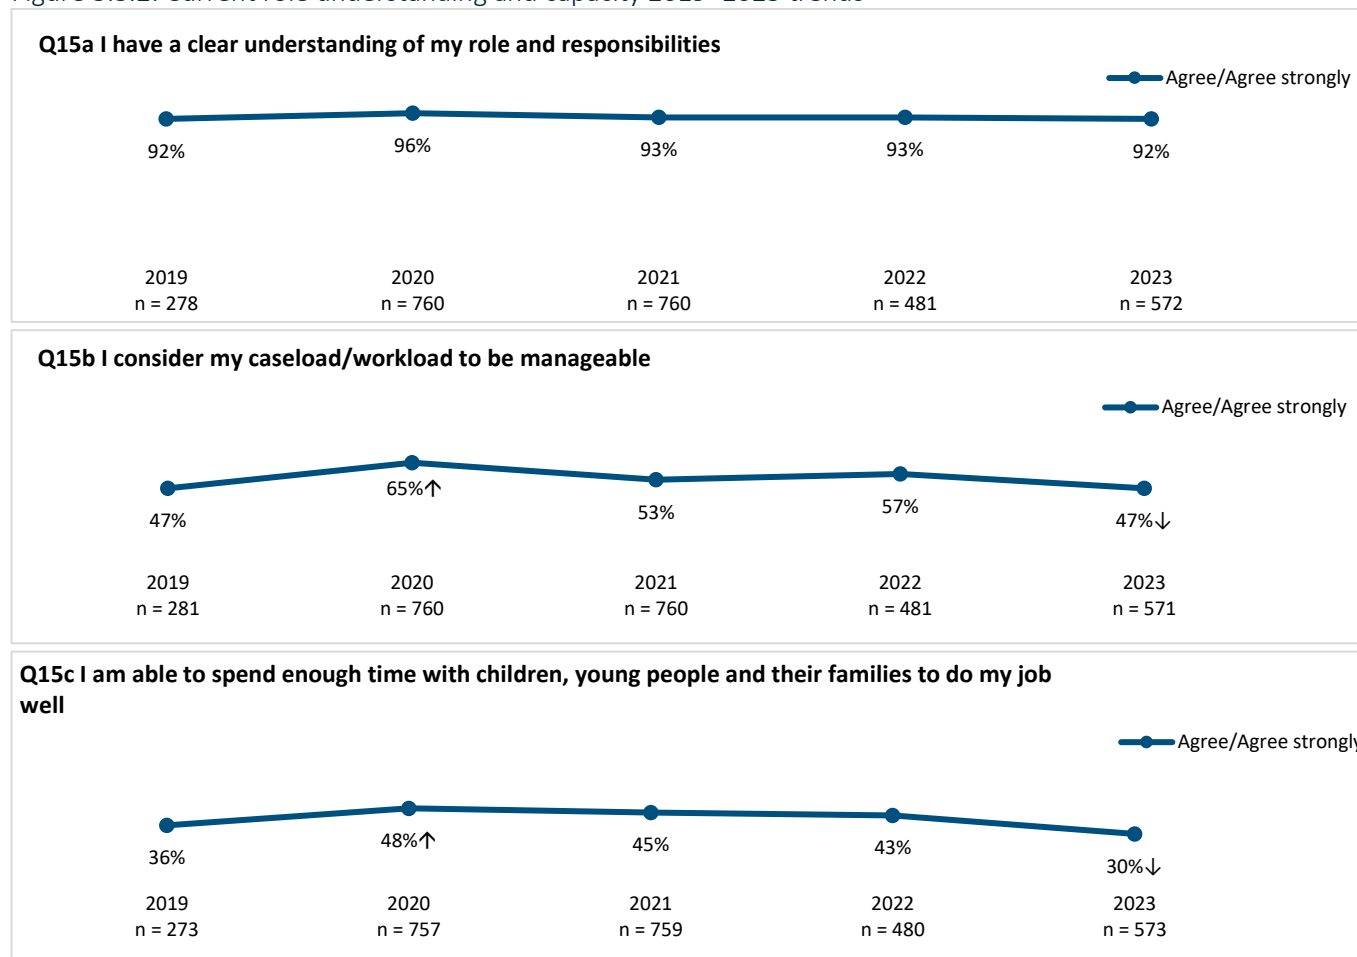

Figure 3.3.1: Current role understanding and capacity (2023)

3.3.2 Comparison to previous survey data (2019–2023)

Compared to 2022, significantly fewer respondents agreed or strongly agreed that they consider their caseload or workload to be manageable (57% in 2022, 47% in 2023) or that they are able to spend enough time with children, young people and their families to do their job well (43% in 2022, 30% in 2023).

Figure 3.3.2: Current role understanding and capacity 2019–2023 trends⁺

⁺ Data for 2019 to 2021 only includes Child Protection (CP) workers. Data for 2022 and 2023 includes Youth Justice (YJ) along with Child Protection (CP) workers
 ↑ ↓ indicates a significant increase or decrease from the previous wave at at least the 95% confidence level.

3.3.3 Sub-group differences (2023)

Respondents working in non-government organisations were more likely than government respondents to agree or strongly agree that their caseload or workload is manageable (60% non-government, 34% government), that risk assessment in holding higher than manageable caseload / workload is undertaken adequately (45% non-government, 18% government) or that they are able to spend enough time with children, young people and their families to do their job well (44% non-government, 16% government).

Respondents working in the Sunshine Coast and Central DCSSDS region were significantly more likely than respondents from other DCSSDS regions to agree or strongly agree that risk assessment in holding higher than manageable caseload / workload is undertaken adequately (47%, 31% average).

Those working in the child protection sector (42%) were more likely than those in youth justice (24%) to disagree or strongly that their caseload or workload is manageable.

Other sub-group differences are detailed in Tables 3.3.1 and 3.3.2 overleaf.

 Base: All respondents electing/able to answer

Q15e I receive support from my colleagues/peers to do my job well

Q15d I receive the right amount of professional practice supervision to do my job well

3.3.4 2023 result

Most respondents agreed or strongly agreed (75%) they receive support from colleagues and peers to do their job well (28% strongly agreed, 46% agreed). 49% agreed or strongly agreed that they receive the right amount of professional practice supervision to do their job well, while 30% disagreed or strongly disagreed. The remaining 13% were neutral.

Figure 3.3.3: Support from colleagues/peers and supervision to do their job well (2023)

3.3.5 Comparison to previous survey data (2020–2023)

Perceptions of the adequacy of both the level of support received from colleagues and peers (75% in 2023, 87% in 2022), as well as the level of professional practice supervision (49% in 2023, 63% in 2022), were lower in 2023 compared to reported levels of agreement in 2022.

Figure 3.3.4: Your current role and professional development 2020–2023 trends⁺

⁺ Data for 2020 to 2022 only includes Child Protection (CP) workers. Data for 2023 includes Youth Justice (YJ) along with Child Protection (CP) workers

Q60 Where do you receive your professional practice supervision?

Q61 How would you prefer to receive your professional practice supervision?

3.3.7 2023 result

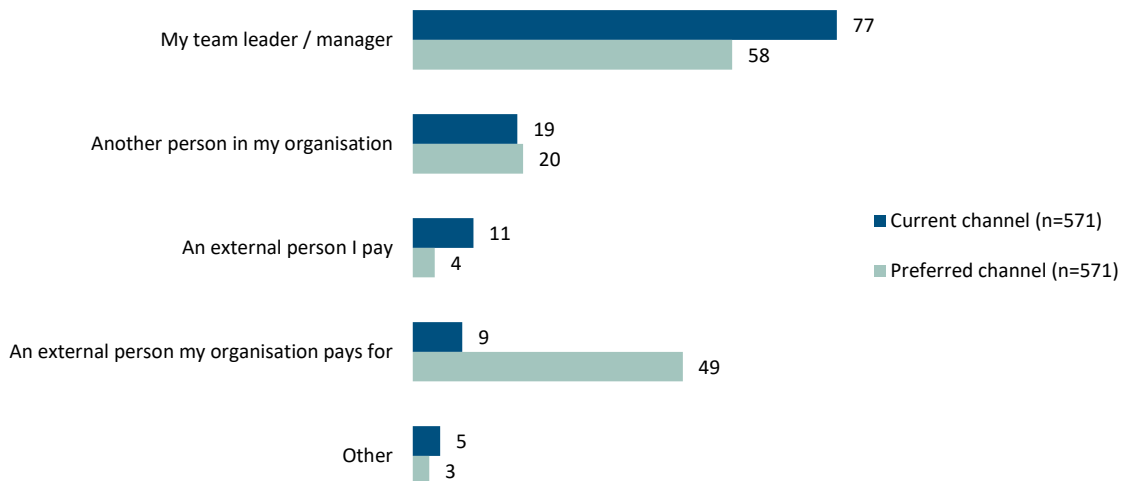

Over three quarters of respondents reported that they currently receive professional practice supervision from their team leader or manager (77%). At a lower incidence, 19% indicated they receive professional practice supervision from another person within their organisation, 11% reported supervision via an external person they personally pay for, while 9% had supervision via an external person their organisation pays for.

When asked whom the respondent would prefer to receive professional practice from, respondent views were split, with 58% nominating their team leader or manager and 49% preferring a person external to their organisation that their organisation pays for.

Figure 3.3.5: Professional practice supervision (2023)

Q60/Q61 Professional practice supervision (Current and preferred channel)

Base: All respondents electing/able to answer
% respondents

3.3.8 Comparison to previous survey data (2022–2023)

There were no statistically significant differences observed between 2022 and 2023 with respect to current and preferred methods of receiving professional practice supervision.

Figure 3.3.6: Professional practice supervision received 2022–2023 trends

↑↓ indicates a significant increase or decrease from the previous wave at at least the 95% confidence level.

Figure 3.3.7: Preferred professional practice supervision 2022–2023 trends

↑↓ indicates a significant increase or decrease from the previous wave at at least the 95% confidence level.

3.3.9 Sub-group differences (2023)

Non-government respondents were significantly more likely to report that professional practice supervision was undertaken by an external person their organisation pays for (18%) in contrast to government respondents (1%). Additionally, non-government respondents were more likely to prefer to have their professional practice supervision undertaken by an external person that their organisation pays for (56%) in contrast to preferences reported by government respondents for this type of supervision (42%). Government respondents were most likely to prefer having their team leader or manager provide professional practice supervision (63%).

Respondents working in the child protection sector were more likely than those working in the youth justice sector to currently receive their professional practice supervision from their team leader or manager (81% child protection, 60% youth justice) and to prefer receiving supervision in this manner (61% child protection, 52% youth justice).

Respondents performing a middle or senior management role were significantly more likely to report they would prefer their professional practice supervision to be undertaken by an external person their organisation pays for (60%) compared to respondents not in a supervisory role (41%) who reported preferring their supervision to be undertaken by their team leader or manager (65%).

Refer to detail in Tables 3.3.5 and 3.3.6.

Q63 My organisation supports staff to manage work stress and maximise our health and wellbeing.

3.3.10 2023 result

43% of respondents agreed or strongly agreed that their organisation supports staff to manage work stress, health and wellbeing, with 12% strongly agreeing and 30% agreeing. The remainder either disagreed (34%) or were neutral (23%).

Figure 3.3.8: Organisation supports staff regarding stress, health and wellbeing (2023)

3.3.11 Comparison to previous survey data (2022–2023)

In 2023, there were significantly lower levels agreement from respondents that their organisation supports staff to manage work stress and maximise health and wellbeing (60% in 2022, 43% in 2023).

Figure 3.3.9: Organisation supports staff regarding stress, health and wellbeing 2022–2023 trends

3.3.12 Sub-group differences (2023)

Respondents working in non-government organisations were more likely to agree or strongly agree that their organisation supports staff regarding stress, health and wellbeing (59%) compared to respondents working in government agencies (26%).

Those who have worked in their sector for longer (i.e. 10+ years) were more likely to disagree or strongly disagree that their organisation supports staff regarding stress, health and wellbeing (42% disagreed or strongly disagreed) compared to respondents who have worked in the sector for less than 10 years (30% disagreed or strongly disagreed). Child protection staff (37%) were also more likely to disagree with this statement (22% youth justice staff).

Other sub-group differences are detailed in Tables 3.3.7 and 3.3.8.

Q64 The work I do:

- a) serves an important purpose
- b) leads to positive change
- c) gives me a sense of satisfaction

3.3.13 2023 result

Almost all respondents agreed or strongly agreed their work serves an important purpose (97%). Most agreed their work gives them a sense of satisfaction (76%) or leads to positive change (75%). There were minimal levels of disagreement, although 17% of respondents were neutral in terms of the work they do providing them with a sense of satisfaction and 19% of respondents provided a neutral response as to whether the work that they do 'leads to positive change'.

Figure 3.3.10: Agreement with statements about the outcomes of the respondent's role (2023)

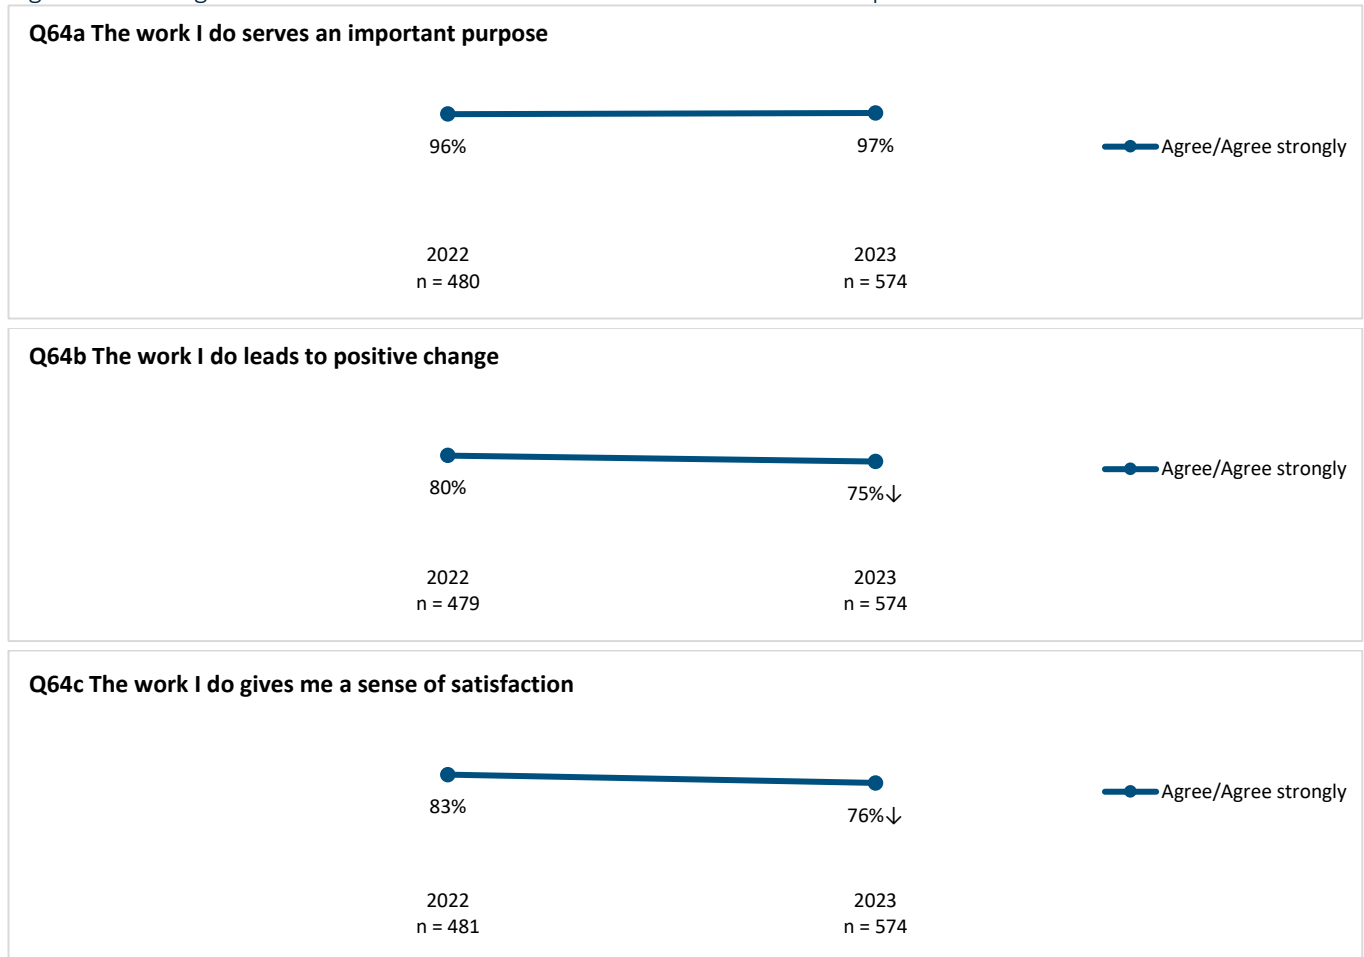

3.3.14 Comparison to previous survey data (2022–2023)

There was a significant decrease in total levels of agreement that the work of the respondent leads to a positive change (80% in 2022, 75% in 2023) or that it gives a sense of satisfaction (83% in 2022, 76% in 2023).

Meanwhile, the level of total agreement from respondents that the work they do serves an important purpose was reported at a high level across both years (96% in 2022, 97% in 2023).

Figure 3.3.11: Agreement with statements about the outcomes of the respondent's role 2022–2023 trends

3.3.15 Sub-group differences (2023)

Respondents working in non-government organisations were more likely than government based respondents to agree or strongly agree that the work they do gives them a sense of satisfaction (82% non-government, 70% government) or that their work leads to positive change (85% non-government, 65% government). Those who identify as an Aboriginal and/or Torres Strait Islander person (84%) were more likely than those who do not identify as such (73%) to disagree that their work leads to positive change.

Other sub-group differences are detailed in Tables 3.3.9 and 3.3.10 overleaf.

3.4 Professional development

Q16a I have been provided with enough training and other learning opportunities to undertake my role well.

3.4.1 2023 result

59% of respondents agreed or strongly agreed they have been provided with enough training and other learning opportunities to undertake their role well, with 14% strongly agreeing and 45% agreeing. 21% disagreed or strongly disagreed while 21% were neutral.

Figure 3.4.1: Provided with enough training and other learning opportunities to undertake role well (2023)

3.4.2 Comparison to previous survey data (2019–2023)

Total agreement (agreed or strongly agreed) with the statement 'I have been provided with enough training and other learning opportunities to undertake my role well' was reported at a significantly lower level in 2023 (59%) compared to 2022 (66%). This continued a gradual declining trend observed since 2020.

Figure 3.4.2: Provided with enough training and other learning opportunities to undertake role well 2019–2023 trends⁺

⁺ Data for 2019 to 2021 only includes Child Protection (CP) workers. Data for 2022 and 2023 includes Youth Justice (YJ) along with Child Protection (CP) workers

3.4.3 Sub-group differences (2023)

Non-government respondents were more likely than government respondents to agree or strongly agree they have been provided with sufficient training and learning opportunities to undertake their job well (65% non-government, 52% government). Those who have worked in the sector for 10 or more years (66%) were also more likely to agree than those who are newer to the sector (54% <10 years tenure).

Other sub-group differences are detailed in Tables 3.4.1 and 3.4.2.

Q16f In your opinion, what are the highest learning and development priorities for the child protection and family support workforce?

3.4.4 2023 result

Respondents were asked the open-ended question 'In your opinion, what are the highest learning and development priorities for the child protection and family support workforce?'. The most prevalent responses were related to the need for:

- specialist training, such as domestic and family violence training (29%)
- identifying and assessing risk, and structured decision making (17%)
- cultural capability / working with Aboriginal and/or Torres Strait Islander peoples (10%)
- skills, practices and tools for engaging clients (i.e. interpersonal skills / relationships / interviewing skills) (10%).

Other priorities included working with other organisations (7%), improved understanding of child protection legislation (7%), obtaining qualification or other accredited training (5%), and obtaining supervision / mentoring to build skills (5%). Other suggestions are included in Figure 3.4.3 below.

Figure 3.4.3: Learning and development priorities for the child protection and family support workforce (2023)

3.4.5 Comparison to previous survey data (2021–2023)

In 2023, more respondents indicated they were unsure or unable to provide an indication of the highest learning and development priorities for the child protection and family support workforce (28% in 2022, 37% in 2023). Likely associated with this, a decrease was noted in reported mentions of specialist training being a key need (40% in 2022, 29% in 2023); however it remained the most commonly mentioned priority among respondents.

Figure 3.4.4: Learning and development priorities for the child protection and family support workforce 2021–2023 trends⁺

⁺ Data for 2021 only includes Child Protection (CP) workers. Data for 2022 and 2023 includes Youth Justice (YJ) along with Child Protection (CP) workers
 ↑↓ indicates a significant increase or decrease from the previous wave at at least the 95% confidence level.

3.4.6 Sub-group differences (2023)

More non-government respondents (36%) than government respondents (23%) considered specialist training a priority. Far North Queensland DCSSDS region respondents were the least likely across all regions to indicate that specialist training was a priority (9%).

Respondents with 10 or more years' experience were significantly more likely to prioritise learning and development regarding identifying and assessing risk / structured decision making (25%) than respondents who had less experience (13%). Higher mentions of this aspect was also noted among government workers (20%) or respondents in middle and senior management roles (23%).

Respondents who identify as an Aboriginal and/or Torres Strait Islander person were significantly more likely than other respondents to prioritise learning and development related to cultural capabilities and working with Aboriginal and/or Torres Strait Islander peoples (22% compared to 8% other respondents).

Other sub-group differences are detailed in Tables 3.4.3 and 3.4.4.

New question in 2023

Q98 your opinion, what are the highest learning and development priorities for the youth justice workforce?

3.4.7 2023 result

Respondents were asked the open-ended question 'In your opinion, what are the highest learning and development priorities for the youth justice workforce?'. The most prevalent responses were related to the need for:

- specialist training, such as domestic and family violence training, trauma, alcohol / drug use and mental health (27%)
- early intervention / identifying and assessing risk / structured decision making (15%)
- strategies to prevent offending / re-offending / recidivism / restorative justice (12%)
- cultural capability / training / work with Aboriginal and/or Torres Strait Islander peoples (10%).

Other priorities included family engagement and family support strategies (9%), skills to engage with clients (9%) and collaboration with other stakeholders and organisations (7%). Other suggestions are included in Figure 3.4.5 below.

Figure 3.4.5: Learning and development priorities for the youth justice workforce (2023)

**3.4.8 Sub-group differences (2023)**

Non-government respondents were significantly more likely to prioritise specialist training requirements for the youth justice workforce (36%) compared to government respondents (17%). As with the child protection and family support workforce, respondents who identify as Aboriginal and/or Torres Strait Islander recommended focusing on cultural capability / training (29%) to a significantly higher extent than other respondents (7%).

Other sub-group differences are detailed in Tables 3.4.5 and 3.4.6 overleaf.

Q62 How much do you agree or disagree with the following statements?

a) I am aware of the impact of trauma on brain development

b) I keep up with the latest evidence about child and adolescent brain development

c) Mandatory training in neuroscience would improve the practice of frontline workers in the child protection and family support sector

3.4.9 2023 result

Almost all respondents agreed or strongly agreed that they are aware of the impact of trauma on brain development (97%). The majority of respondents agreed or strongly agreed that mandatory training in neuroscience would improve the practice of frontline workers in the child protection and family support sector (86%).

70% of respondents agreed or strongly agreed that they keep up with the latest evidence about child and adolescent brain development (27% strongly agreed, 43% agreed), while 20% gave a neutral rating and 10% disagreed or strongly disagreed that they do this.

Figure 3.4.6: Impact of trauma on brain development, evidence and training in neuroscience and brain development (2023)

3.4.10 Comparison to previous survey data (2022–2023)

Respondents' level of awareness and knowledge regarding matters of brain development and neuroscience was consistent between 2022 and 2023.

Figure 3.4.7: Impact of trauma on brain development, evidence and training in neuroscience and brain development 2022–2023 trends⁺

⁺ Data for 2022 only includes Child Protection (CP) workers. Data for 2023 includes Youth Justice (YJ) along with Child Protection (CP) workers

3.4.11 Sub-group differences (2023)

All respondent sub-groups were in high agreement that they are aware of the impact of trauma on brain development; however non-government respondents (59%) or those with 10 or more years of experience (58%) were significantly more likely than others to strongly agree. Significantly fewer respondents identifying as an Aboriginal and/or Torres Strait Islander person agreed or strongly agreed that they were aware of the impact of trauma on brain development (89%) compared to other respondents (98%).

Non-government respondents were significantly more likely to agree or strongly agree that they keep up with the latest evidence about child and adolescent brain development (80% agreed or strongly agreed) compared to government respondents (60% agreed or strongly agreed).

The reader is referred to Tables 3.4.7 and 3.4.8 for sub-group differences.

3.5 Working with clients

Q20b My workplace has a culture that supports collaboration with other organisations to achieve client outcomes

Q20e I have enough time in my role to build relationships with other organisations / service providers

3.5.1 2023 result

78% of respondents agreed or strongly agreed their workplace has a culture that supports collaboration with other organisations, while 10% disagreed or strongly disagreed that this culture exists in their organisation. The remaining 12% were neutral.

Respondents were mixed in their perceptions of whether they had time to build relationships with other organisations and service providers with 41% who agreed or strongly agreed that they have enough time in their role to do this and 39% who disagreed or strongly disagreed. 20% were neutral.

Figure 3.5.1: Collaboration and relationship building across the child protection and family support sector (2023)

3.5.2 Comparison to previous survey data (2019–2023)

Overall agreement regarding collaboration and building relationships with other organisations in 2023 was consistent with 2022 results.

Figure 3.5.2: Collaboration and relationship building across the child protection and family support sector 2019–2023 trends

+ Data for 2019 to 2021 only includes Child Protection (CP) workers. Data for 2022 and 2023 includes Youth Justice (YJ) along with Child Protection (CP) workers
 ↑↓ indicates a significant increase or decrease from the previous wave at at least the 95% confidence level.

3.5.3 Sub-group differences (2023)

Non-government respondents were more likely than government respondents to agree overall that their workplace has a culture that supports collaboration with other organisations (85% non-government, 71% government) or that they have time in their role to build relationships with other organisations (51% non-government, 30% government).

Respondents working in the South West DCSSDS region were more likely than respondents from other areas to disagree overall that they have enough time in their role to build relationships with other organisations (53% disagreed or strongly disagreed compared to 39% average).

Respondents in senior or middle management roles were more likely than non-supervisory staff to agree their workplace has a culture that supports collaboration with other organisations (85% agreed or strongly agreed, 74% agreement among respondents with no supervisory responsibilities). Senior or middle management staff (46%) were also more likely than non-supervisory staff (37%) to agree or strongly agree that they have enough time to build relationships with other organisations.

The reader is referred to Tables 3.5.1 and 3.5.2 for sub-group differences.

Q66 How do you collaborate with services that are also working with the children, young people or their families you are working with?

3.5.4 2023 result

Respondents were asked how they collaborate with other services working with the children, young people or families they are working with. 46% of respondents reported attending stakeholder or interagency meetings or liaising with these stakeholders. Additionally, 28% indicated they attend case or care team meetings and 25% work collaboratively and share information to achieve the best outcomes.

Beyond meetings, discussions and sharing information, 20% reported having collaborated via email and phone and 18% work with families, care givers and clients to connect with long term supports.

The full range of responses to this question are shown in Figure 3.5.3.

Figure 3.5.3: Collaboration with services that are also working with the children, young people or their families you are working with (2023)

3.5.5 Comparison to previous survey data (2022–2023)

Key changes since 2022 in reported activities for collaborating with other services included:

- an increase in mentions of engage in community / cultural activities / events (8% in 2022, 14% in 2023)
- an increase in mentions of effective / regular communication (0% in 2022, 9% in 2023)
- a decrease in mentions of attending meetings / case / care team meetings / case discussions (46% in 2022, 28% in 2023)
- a decrease in mentions of referrals / referral pathways / communication (27% in 2022, 8% in 2023).

Figure 3.3.4: Collaboration with services that are also working with the children, young people or their families you are working with 2022–2023 trends

Q66 How do you collaborate with services that are also working with the children, young people or their families you are working with?

Base: All respondents able/electing to answer
% of respondents

↑↓ indicates a significant increase or decrease from the previous wave at at least the 95% confidence level.

3.5.6 Sub-group differences (2023)

Compared with non-government employees, those working for government were more likely to report that they attend case or care team meetings (34% government, 23% non-government), collaborate via email or phone calls (26% government, 14% non-government) or conduct in person visits (14% government, 7% non-government). Respondents working in a non-government organisation were significantly more likely to report engaging in community / cultural activities / events as a method of collaboration with other services (22%) in comparison to government respondents (7%).

Youth justice sector workers (24%), Aboriginal and/or Torres Strait Islander people (26%) or those in senior or middle manager roles (19%) were also more likely than others to report engaging in community / cultural activities / events as a method of collaboration with other services (average 14%).

Those working in the Far North Queensland DCSSDS region were more likely than those working in other regions to have reported attending meetings / case / care team meetings / case discussions (48% compared to 28% average).

Respondents working in a non-supervisory role were more likely to report collaborating via email / email chains / phone calls (27%, 12% middle and senior management). Other sub-group differences are outlined in Tables 3.5.3 and 3.5.4.

3.6 My organisation

Q21b In my organisation, children, young people and their families have the opportunity to participate in decisions affecting their lives.

3.6.1 2023 result

65% of respondents agreed or strongly agreed that children, young people and families have the opportunity to participate in decisions affecting their lives (18% strongly agreed, 47% agreed). 15% disagreed or strongly disagreed with this statement and 20% were neutral.

Figure 3.6.1: Children, young people and their families have the opportunity to participate in decisions affecting their lives (2023)

3.6.2 Comparison to previous survey data (2019–2022)

Compared with 2022 findings (72%), fewer respondents in 2023 agreed or strongly agreed that children, young people and their families have the opportunity to participate in decisions affecting them (65%).

Figure 3.6.2: Children, young people and their families have the opportunity to participate in decisions affecting their lives 2019–2023 trends*

* Data for 2019 to 2021 only includes Child Protection (CP) workers. Data for 2022 and 2023 includes Youth Justice (YJ) along with Child Protection (CP) workers
 ↑↓ indicates a significant increase or decrease from the previous wave at at least the 95% confidence level.

3.6.3 Sub-group differences (2023)

Non-government respondents (74%) were more likely than government respondents (57%) to agree or strongly agree that children, young people and families have the opportunity to participate in decisions affecting their lives. Higher agreement was also noted among senior or middle management (71%, non-supervisory staff 61%).

Other sub-group differences are outlined in Tables 3.6.1 and 3.6.2.

Q37a Thinking about your organisation, how much do you agree or disagree my organisation is a Child Safe Organisation (i.e., creates a culture, adopts strategies and takes action to promote child wellbeing and prevent harm to children and young people)

3.6.4 2023 result

The majority of respondents (78%) agreed or strongly agreed their organisation is a Child Safe Organisation (30% strongly agreed, 47% agreed). 9% of respondents disagreed or strongly disagreed their organisation was a Child Safe Organisation, while 14% were neutral.

Figure 3.6.3: Their organisation is a Child Safe Organisation (2023)

3.6.5 Comparison to previous survey data (2021–2023)

In 2023, total agreement (those who agreed or strongly agreed) regarding whether respondents considered their organisation to be a Child Safe Organisation was significantly lower than reported in 2022 (87% in 2022, 78% in 2023).

Figure 3.6.4: Their organisation is a Child Safe Organisation 2021–2023 trends⁺

⁺ Data for 2021 and 2022 only includes Child Protection (CP) workers. Data for 2023 includes Youth Justice (YJ) along with Child Protection (CP) workers
 ↑ ↓ indicates a significant increase or decrease from the previous wave at at least the 95% confidence level.

3.6.6 Sub-group differences (2023)

Non-government respondents (88%) were more likely than government respondents (68%) to agree or strongly agree that their organisation is a Child Safe Organisation. Similarly, senior or middle managers (83%) were more likely than supervisory staff (74%) to agree.

Other sub-group differences are detailed in Tables 3.6.3 and 3.6.4.

Q69 Children and young people attending my organisation:

a) feel cared for and welcome

b) feel safe

3.6.7 2023 result

Respondents were asked whether they believed the children and young people attending their organisation felt cared for, welcome and safe. 68% of respondents agreed or strongly agreed that children and young people feel cared for and welcome and 68% agreed they feel safe when attending their organisation. Around 10% disagreed or strongly disagreed with these statements, the remainder were neutral.

Figure 3.6.5: Children and young people attending their organisation feel cared for, welcome and safe (2023)

3.6.8 Comparison to previous survey data (2022–2023)

Agreement (agreed or strongly agreed) with both statements was significantly lower in 2023 compared to 2022. The consideration that children and young people attending the respondent's organisation feel cared for and welcome decreased from 83% overall agreement in 2022 to 68% in 2023. In the same way, agreement that children and young people feel safe when attending the respondent's organisation decreased from 83% in 2022 to 68% in 2023.

Figure 3.6.6: Children & young people attending their organisation feel cared for, welcome & safe 2022–2023 trends

↑↓ indicates a significant increase or decrease from the previous wave at at least the 95% confidence level.

3.6.9 Sub-group differences (2023)

Respondents working in non-government organisations were more likely than their government-based counterparts to agree or strongly agree that children and young people attending their organisation feel safe (84% non-government, 52% government) or that they feel cared for and welcome (86% non-government, 50% government).

Those who identify as an Aboriginal and/or Torres Strait Islander person were more likely than those who do not identify as such to agree or strongly agree children and young people attending their organisation feel cared for and welcome (81%, 66% among those who do not identify as such) or feel safe (78%, 66% among those who do not identify as such).

Other sub-group differences are detailed in Tables 3.6.5 and 3.6.6.

Q70 Children and young people attending my organisation:

- a) have access to the documents they need (such as identity documents) for accessing support and other services
- b) can access health services when they need them
- c) can access mental health services when they need them
- d) receive sufficient support to access early childhood education and care
- e) receive sufficient support to attend school

3.6.10 2023 result

Respondents were asked about the degree of access and support children and young people have.

Highest agreement (those who agreed or strongly agreed) was found in relation to the belief that children and young people:

- have access to the documents they need for accessing services (65%)
- have access to health services when they need them (61%)
- receive sufficient support to access early childhood education and care (60%)
- receive sufficient support to attend school (58%).

At a slightly lower level of agreement, 43% of respondents agreed or strongly agreed that children and young people can access mental health services with a similar proportion (39%) disagreeing or strongly disagreeing. 17% were neutral.

Figure 3.6.7: Access and support received by children and young people (2023)

3.6.11 Comparison to previous survey data (2022–2023)

In 2023, there was lower reported agreement that children and young people can access mental health services when they need them (43%) compared to agreement in 2022 (50%).

Opinions regarding whether children and young people can access and receive other components of support and services were otherwise consistent in 2023 to those noted in 2022.

Figure 3.6.8: Access and support received by children and young people 2022–2023 trends

Figure 3.6.8: Access and support received by children and young people 2022–2023 trends (continued)

3.6.12 Sub-group differences (2023)

Respondents working in the child protection sector were more likely than those working in the youth justice sector to agree or strongly agree that children and young people attending their organisation can access health services when they need them (65% child protection sector, 49% youth justice sector) or that they receive sufficient support to access early childhood education and care (65% child protection sector, 34% youth justice sector).

Generally speaking, those with fewer than 10 years of experience tended to be more likely than their more experienced counterparts to agree with statements on access and support.

Other sub-group differences are outlined in Tables 3.6.7 and 3.6.8.

3.7 Meeting client needs

Q71 Aboriginal and Torres Strait Islander children and young people attending my organisation:

a) are supported to preserve their cultural and linguistic identity

b) are supported to stay connected with their communities

3.7.1 2023 result

Respondents were asked about cultural support provided to Aboriginal and Torres Strait Islander children and young people. 67% of respondents agreed that Aboriginal and Torres Strait Islander children and young people are supported to preserve their cultural and linguistic identity and 64% agreed they are supported to stay connected with their communities.

16% of respondents either disagreed or strongly disagreed that Aboriginal and Torres Strait Islander children and young people attending their organisation are supported to stay connected with their communities. A similar proportion (14%) disagreed that they are supported to preserve their cultural and linguistic identity. Around 20% of respondents were neutral with respect to these statements.

Figure 3.7.1: Supporting Aboriginal and Torres Strait Islander children and young people to preserve their cultural and linguistic identity and stay connected with their community (2023)

3.7.2 Comparison to previous survey data (2022–2023)

Agreement levels (agree/agree strongly) regarding the supports provided to Aboriginal and Torres Strait Islander children and young people to stay connected with their culture and community were significantly lower in 2023 compared to 2022 for both statements.

Figure 3.7.2: Supporting Aboriginal and Torres Strait Islander children and young people to preserve their cultural and linguistic identity and stay connected with their community 2022–2023 trends

Q71 Aboriginal and Torres Strait Islander children and young people attending my organisation are supported to preserve their cultural and linguistic identity

Q71 Aboriginal and Torres Strait Islander children and young people attending my organisation are supported to stay connected with their communities

↑↓ indicates a significant increase or decrease from the previous wave at at least the 95% confidence level.

3.7.3 Sub-group differences (2023)

Respondents working for non-government organisations were more likely than government employees to agree or strongly agree that Aboriginal and Torres Strait Islander children and young people are supported to preserve their cultural and linguistic identity (75% non-government, 60% government) or are supported to stay connected to their community (70% non-government, 58% government).

Respondents working in the Far North Queensland DCSSDS region were significantly more likely than respondents from other DCSSDS regions to agree or strongly agree Aboriginal and Torres Strait Islander children and young people are supported to stay connected to their community (76%, 64% average).

Respondents who identify as Aboriginal and/or Torres Strait Islander were significantly more likely than other respondents to *strongly* agree that Aboriginal and Torres Strait Islander children and young people are supported to preserve their cultural and linguistic identity (39%) or are supported to stay connected with their communities (39%).

Other sub-group differences are outlined in Tables 3.7.1 and 3.7.2.

Q72 Culturally and linguistically diverse children and young people attending my organisation:

a) are supported to preserve their cultural and linguistic identity

b) are supported to stay connected with their communities

3.7.4 2023 result

Respondents were asked about cultural support provided to children and young people from cultural and linguistically diverse backgrounds. Approximately 60% of respondents agreed or strongly agreed that culturally and linguistically diverse children and young people are supported to preserve their cultural and linguistic identity (60%) or that they are supported to stay connected with their communities (58%).

18% of respondents disagreed or strongly disagreed that children and young people from cultural and linguistically diverse backgrounds are supported to stay connected with their communities. 16% disagreed that these groups are supported to preserve their cultural and linguistic identity. 24% were neutral regarding preserving identity and 25% were neutral in terms of support to stay connected.

Figure 3.7.3: Supporting culturally and linguistically diverse children and young people to preserve their cultural and linguistic identity and stay connected with their community (2023)

3.7.5 Comparison to previous survey data (2022–2023)

Agreement levels regarding the supports provided to children and young people from culturally and linguistically diverse backgrounds to stay connected with their culture and community were significantly lower in 2023 compared to 2022 for both statements.

Q73 Children and young people attending my organisation who have a disability can access appropriate support

Q74 Children, young people and their families attending my organisation are provided with sufficient support and opportunities to keep their children at home where appropriate

Q75 Young people attending my organisation who are making the transition from out-of-home care to independent living can access appropriate transition services when they need them

New questions in 2023:

Q74A The children and young people attending my organisation are provided with sufficient support and linked to services to reduce recidivism

Q75A Young people on statutory community orders have a plan in place for when they transition out of the youth justice system

3.7.7 2023 result

64% of respondents agreed or strongly agreed that children and young people with a disability can access appropriate support. There was also majority agreement (59% agreed or strongly agreed) that children, young people and their families are provided with sufficient support and opportunities to keep their children at home where appropriate.

Opinions were more varied on the following statements regarding children, young people and families:

- they are provided with sufficient support and linked to services to reduce recidivism (46% agreed or strongly agreed, 26% disagreed or strongly disagreed)
- those who are making the transition from out-of-home care to independent living can access appropriate transition services when they need them (44% agreed or strongly agreed, 34% disagreed or strongly disagreed)
- young people on statutory community orders have a plan in place for when they transition out of the youth justice system (28% agreed or strongly agreed, 30% disagreed or strongly disagreed, 42% neutral).

Figure 3.7.5: Supports for children, young people and families (2023)

3.7.8 Comparison to previous survey data (2022–2023)

In 2023, overall agreement that children and young people who have a disability can access appropriate support decreased significantly from 72% in 2022 to 64% in 2023.

There were also decreases in agreement noted with respect to whether children, young people and their families attending the respondent's organisation are provided with sufficient support and opportunities to keep their children at home where appropriate (70% in 2022, 59% in 2023) or that those who are transitioning from out-of-home care to independent living can access appropriate transition services when they need them (52% in 2022, 44% in 2023).

Figure 3.7.6: Supports for children, young people and families 2022–2023 trends⁺

⁺ Data for 2022 "Q74 Young people attending my organisation who are making the transition from out-of-home care to independent living can access appropriate transition services when they need them" and "Q75 Young people attending my organisation who are making the transition from out-of-home care to independent living can access appropriate transition services when they need them" only includes Child Protection (CP) workers. Data for Q73 for 2022 and 2023 includes Youth Justice (YJ) along with Child Protection (CP) workers

↑↓ indicates a significant increase or decrease from the previous wave at at least the 95% confidence level.

3.7.9 Sub-group differences (2023)

Respondents who work in non-government organisations were more likely than government-based respondents to agree or strongly agree with the following statements:

- Children and young people attending my organisation who have a disability can access appropriate support (72% non-government, 56% government)
- Children, young people and their families attending my organisation are provided with sufficient support and opportunities to keep their children at home where appropriate (67% non-government, 52% government)
- The children and young people attending my organisation are provided with sufficient support and linked to services to reduce recidivism (59% non-government, 34% government).

Agreement (agreed or strongly agreed) was higher among child protection workers compared to those in youth justice regarding whether children and young people attending the respondent's organisation who have a disability can access appropriate support (66% child protection, 43% youth justice).

Disagreement (disagreed or strongly disagreed) was higher among respondents with 10 or more years' experience that children and young people attending their organisation are provided with sufficient support and linked to services to reduce recidivism (35% compared to 21% among those with less than 10 years' experience) or that those with a disability can access appropriate support (22%, 13% respectively).

Other sub-group differences are outlined in Tables 3.7.5 and 3.7.6.

3.8 Children's rights

Q78 I have a good working understanding of the United Nations' Convention on the Rights of the Child

3.8.1 2023 result

82% of respondents agreed or strongly agreed they have a good working understanding of the *United Nations' Convention on the Rights of the Child* with 28% strongly agreeing and 54% agreeing. A further 12% were neutral while 6% reported a lack of understanding.

Figure 3.8.1: Level of understanding of the United Nations Convention on the Rights of the Child (2023)

3.8.2 Comparison to previous survey data (2022–2023)

The level of understanding of the *United Nations' Convention on the Rights of the Child* was consistent between 2022 (80%) and 2023 (82%).

Figure 3.8.2: Level of understanding of the United Nations Convention on the Rights of the Child 2022–2023 trends

↑↓ indicates a significant increase or decrease from the previous wave at at least the 95% confidence level.

3.8.3 Sub-group differences (2023)

Respondents working in the child protection sector were significantly more likely than those in the youth justice sector to agree or strongly agree (84% child protection, 65% youth justice) that they have a good working understanding of the *United Nations' Convention on the Rights of the Child*. Similarly, non-government workers (87%, government 77%) or those with 10 or more years of services (87%, <10 years 79%) were more likely than their counterparts to agree with this statement.

Those in middle and senior management roles were more likely than those in non-supervisory positions to report having a good understanding of the *United Nations' Convention on the Rights of the Child* (93% senior and middle management, 75% non-supervisory).

Other sub-group differences are outlined in Tables 3.8.1 and 3.8.2.

Q79 Within my organisation:

- a) children are supported to survive and develop in the best way possible
- b) decisions are made in children's and young people's best interests
- c) the views of children and young people are listened to and valued
- d) children and young people are not discriminated against

3.8.4 2023 result

Respondents mostly agreed or strongly agreed that within their organisation:

- children and young people are not discriminated against (75%)
- children are supported to survive and develop in the best way possible (75%)
- decisions are made in the children's and young people's best interests (74%)
- the views of children and young people are listened to and valued (70%).

Figure 3.8.3: Children's rights upheld within their organisations (2023)

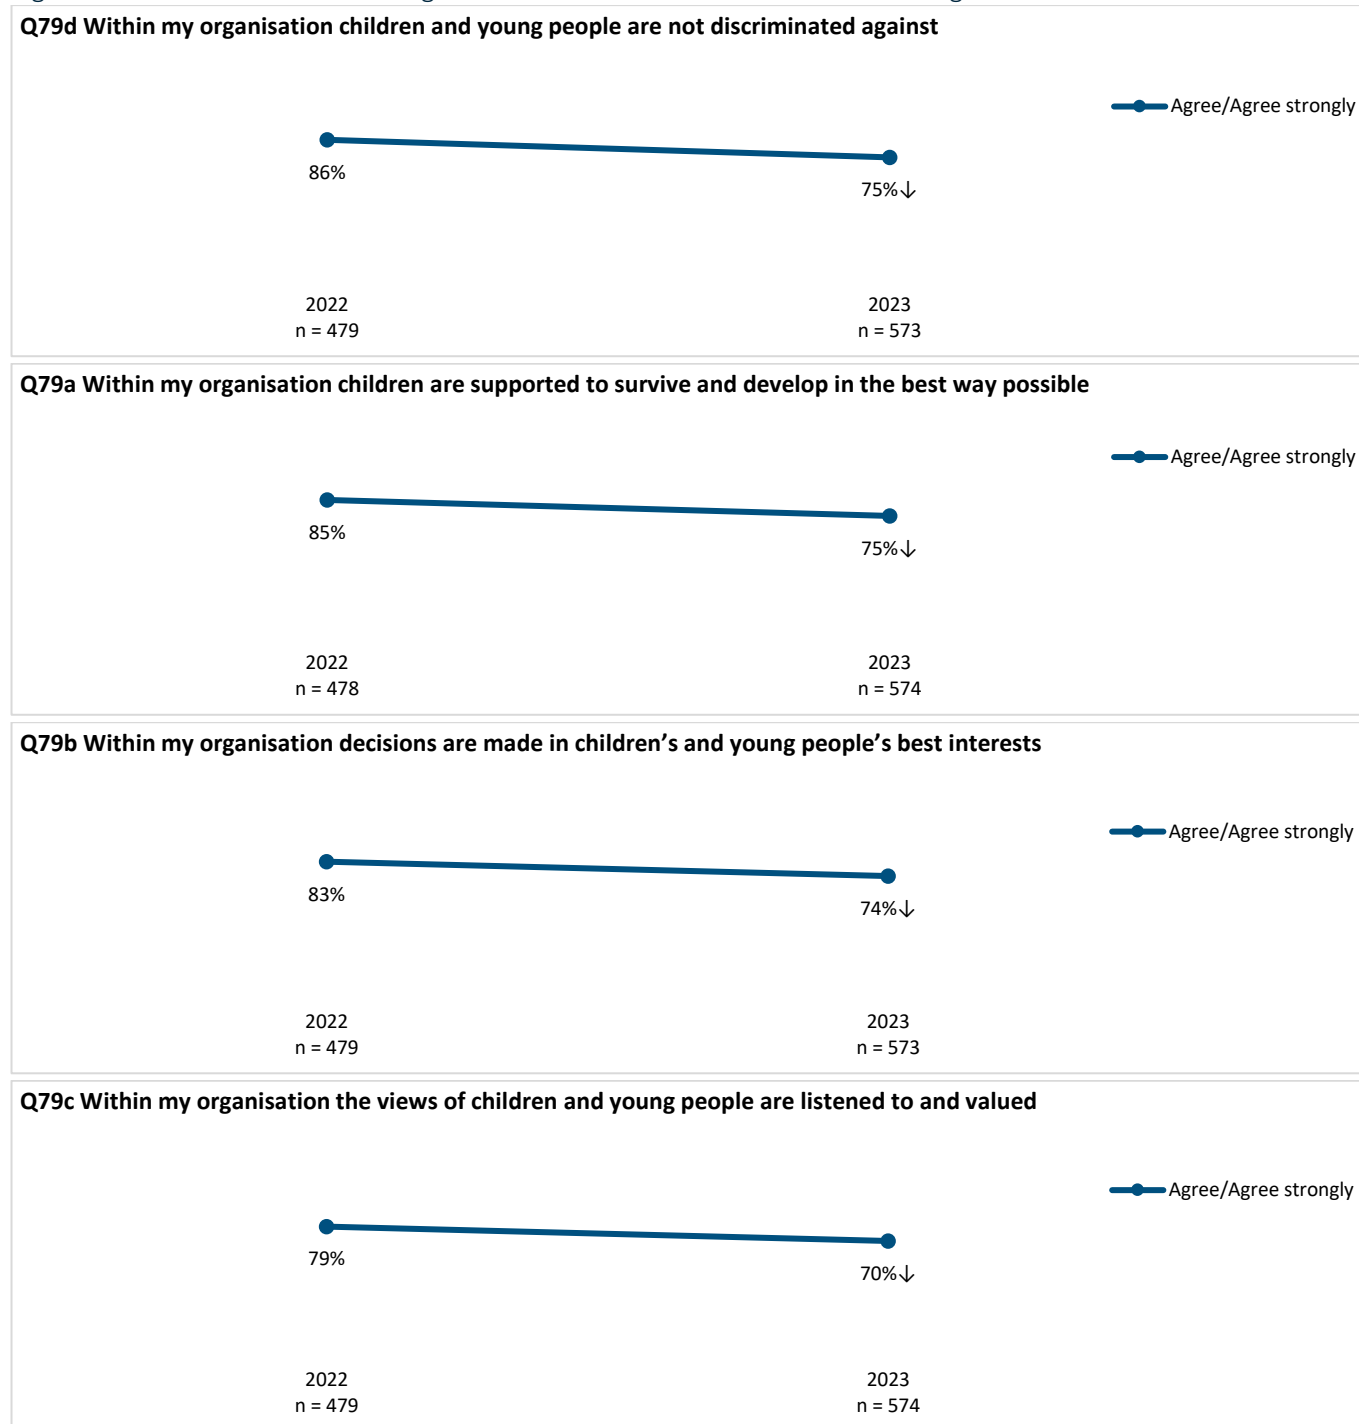

3.8.5 Comparison to previous survey data (2022–2023)

Overall agreement with statements reflecting whether children's and young people's rights were upheld was significantly lower across all aspects measured in 2023 compared to results in 2022.

See Figure 3.8.4 for changes in levels of agree/strongly agree proportions.

Figure 3.8.4: Level of understanding of the United Nations Convention on the Rights of the Child 2022–2023 trends

↑↓ indicates a significant increase or decrease from the previous wave at at least the 95% confidence level.

3.8.6 Sub-group differences (2023)

Across all statements regarding children's rights being upheld within their organisations, non-government workers were more likely than government-based respondents to agree. Similarly, those in senior or middle management roles tend to be more likely than those in non-supervisory roles to agree on selected statements.

Detailed figures to support this finding and other sub-group differences are outlined in Tables 3.8.3 and 3.8.4.

Q84 Within my community, children and young people:

- a) are protected from abuse and neglect*
- b) are supported to live safely at home with their families*
- c) live in safe communities*
- d) can access the services they need to stay healthy, such as GPs and hospitals*
- e) can access the services they need for healthy teeth, such as dentists (New in 2023)*
- f) can access mental health services if needed*
- g) can access disability services if needed*
- h) can access NDIS supports if needed (New in 2023)*
- i) can access early childhood education and care, such as kindergarten*
- j) have support to stay engaged in learning at school or TAFE*
- k) can access sporting, recreational or community activities*
- l) are supported to connect with their culture (for Aboriginal and Torres Strait Islander children and young people)*

3.8.7 2023 result

Respondents were asked their opinion on their broader community and the degree of access, support, and safety that children and young people have.

Respondents were most likely to agree (agreed or strongly agreed) with the following statements with respect to children and young people in their communities:

- having access to early childhood education and care (65%)
- being supported to connect with their culture (for Aboriginal and Torres Strait Islander children and young people) (55%)
- having access to sporting, recreation or community activities (53%).

Lower agreement was noted regarding children and young people in their communities:

- having access to mental health services if needed (35% agreed or strongly agreed, 45% disagreed or strongly disagreed)
- living in safe communities (35% agreed or strongly agreed, 26% disagreed or strongly disagreed)
- being protected from abuse and neglect (43% agreed or strongly agreed, 30% disagreed or strongly disagreed)
- having access to disability services if needed (45% agreed or strongly agreed, 28% disagreed or strongly disagreed)
- having access to NDIS supports if needed (45% agreed or strongly agreed, 27% disagreed or strongly disagreed).

The reader is referred to Figure 3.8.5 for full results.

Figure 3.8.5: Agreement regarding the degree to which children's rights are upheld within local communities (2023)

3.8.8 Comparison to previous survey data (2022–2023)

Respondents' perceptions as to the degree of access, support and safety that children and young people have in their communities was consistent from 2022 to 2023.

Figure 3.8.6: Agreement regarding the degree to which children's rights are upheld within local communities 2022–2023 trends

Q84i In my community, children and young people can access early childhood education and care, such as kindergarten

Q84l In my community, children and young people are supported to connect with their culture (for Aboriginal and Torres Strait Islander children and young people)

Q84k In my community, children and young people can access sporting, recreational or community activities

Q84d In my community, children and young people can access the services they need to stay healthy, such as GPs and hospitals

Figure 3.8.6: Agreement regarding the degree to which children's rights are upheld within local communities 2022–2023 trends (continued)

↑↓ indicates a significant increase or decrease from the previous wave at at least the 95% confidence level.

3.8.9 Sub-group differences (2023)

Generally, respondents working in the child protection sector were more likely than respondents working in youth justice to agree overall (agree or strongly agree) with most of the statements.

Views of government and non-government workers were generally in alignment, one exception being that government workers (59%) were more likely than non-government staff (50%) to agree or strongly agree that children and young people are supported to connect with their culture (for Aboriginal and Torres Strait Islander children and young people).

Often, those who have worked in the sector for a longer period of time (10 or more years) were more likely than those who have worked in the sector for less than 10 years to disagree or strongly disagree with these statements.

Respondents working in the Far North Queensland DCSSDS region were significantly more likely than respondents from other DCSSDS regions to agree or strongly agree that in their community, children and young people are supported to connect with their culture (for Aboriginal and Torres Strait Islander children and young people) (72% Far North QLD, 55% average overall).

Other sub-group differences are outlined in Tables 3.8.5 and 3.8.6.

3.9 Cultural capability

Q23c I understand how the Aboriginal and Torres Strait Islander Child Placement Principle applies to my role

3.9.1 2023 result

The majority (92%) of respondents agreed or strongly agreed that they understand how the Aboriginal and Torres Strait Islander Placement Principle applies to their role (49% strongly agreed, 43% agreed). In total, 4% of respondents disagreed or strongly disagreed that they understand how this applies to their role, while 5% were neutral.

Figure 3.9.1: Understanding of how the Aboriginal and Torres Strait Islander Child Placement Principle applies to their role (2023)

3.9.2 Comparison to previous survey data (2019–2023)

Compared to 2022, there was an increase in agreement regarding respondent understanding of how the Aboriginal and Torres Strait Islander Child Placement Principle applies to their role. Total agreement increased from 80% in 2022 to 92% in 2023, the highest level of agreement noted to date. It should however be noted that in 2023 a 'not applicable' option that was not available in previous years was included. 66 respondents selected N/A in 2023 and have been excluded from the base.

Figure 3.9.2: Understanding of how the Aboriginal and Torres Strait Islander Child Placement Principle applies to their role 2019–2023 trends⁺

⁺ Data for 2019 to 2022 only includes Child Protection (CP) workers. Data for 2023 includes Youth Justice (YJ) along with Child Protection (CP) workers
2023 included a 'Not applicable to my role' option that was not available in previous years. 66 respondents selected N/A in 2023 and have been excluded from the base

↑↓ indicates a significant increase or decrease from the previous wave at at least the 95% confidence level.

The change Most likely due to: 2023 included a 'Not applicable to my role' option that was not available in previous years. 66 respondents selected N/A in 2023 and have been excluded from the base

3.9.3 Sub-group differences (2023)

Respondents working in the child protection sector were significantly more likely to agree they understand how the Aboriginal and Torres Strait Islander Child Placement Principle applies to their role in contrast to those working in youth justice (94% child protection, 78% youth justice).

Other sub-group differences are outlined in Tables 3.9.1 and 3.9.2.

Q22e My organisation partners with Aboriginal and Torres Strait Islander organisations to support the delivery of services to Aboriginal and Torres Strait Islander children, young people, their families and communities.

3.9.4 2023 result

76% of respondents agreed or strongly agreed that their organisation partners with Aboriginal and Torres Strait Islander organisations to support the delivery of services, with 23% strongly agreeing. 10% of respondents indicated that their organisation does not partner in this way. The remaining 14% were neutral on this issue.

Figure 3.9.3: Their organisation partners with Aboriginal and Torres Strait Islander organisations (2023)

3.9.5 Comparison to previous survey data (2019–2023)

There was no statistically significant difference in the incidence of partnerships with Aboriginal and Torres Strait Islander organisations among respondents between the 2022 and 2023 surveys.

Figure 3.9.4: Their organisation partners with Aboriginal and Torres Strait Islander organisations 2019 – 2023 trends⁺

⁺ Data for 2019 to 2021 only includes Child Protection (CP) workers. Data for 2022 and 2023 includes Youth Justice (YJ) along with Child Protection (CP) workers
 ↑ ↓ indicates a significant increase or decrease from the previous wave at at least the 95% confidence level.

3.9.6 Sub-group differences (2023)

Results were relatively consistent across sub-groups regarding the degree of partnering with Aboriginal and Torres Strait Islander organisations. There were no statistically significant differences at the total agree or disagree level. Minor differences are indicated in Tables 3.9.3 and 3.9.4 below.

Table 3.9.3: Their organisation partners with Aboriginal and Torres Strait Islander organisations by organisation type, region and years in sector (2023)

Q89 Thinking about cultural capability, how much do you agree or disagree that delegated authority will result in better outcomes for Aboriginal and Torres Strait Islander children, young people and their families?

3.9.7 2023 result

A total of 57% of respondents agreed (34%) or strongly agreed (23%) that Delegated Authority will result in better outcomes for Aboriginal and Torres Strait Islander children and young people. 33% were neutral, while 11% disagreed or strongly disagreed.

Figure 3.9.5: Delegated Authority will result in better outcomes for Aboriginal and Torres Strait Islander children, young people and their families (2023)

3.9.8 Comparison to previous survey data (2022–2023)

Compared with 2022, in 2023 there were significantly more respondents who agreed or strongly agreed that Delegated Authority will result in better outcomes for Aboriginal and Torres Strait Islander children, young people and their families than noted in 2022 (44% in 2022, 57% in 2023). It should however be noted that in 2023 a 'not applicable' option that was not available in previous years was included. 66 respondents selected N/A in 2023 and have been excluded from the base.

Figure 3.9.6: Delegated Authority will result in better outcomes for Aboriginal and Torres Strait Islander children, young people and their families 2022–2023 trends*

+ Data for 2022 only includes Child Protection (CP) workers. Data for 2023 includes Youth Justice (YJ) along with Child Protection (CP) workers

3.10 Policy issues

Q91 Do you believe that children under the age of 14 should be incarcerated (that is, held in a police watchhouse or placed in youth detention)?

3.10.1 2023 result

31% of respondents indicated that they believe that children under the age of 14 years should be able to be incarcerated, 53% disagreed and 16% were unsure.

Figure 3.10.1: Opinion on whether children under 14 years should be able to be incarcerated (2023)

3.10.2 Comparison to previous survey data (2022–2023)

The proportion of sector workers who believe that children under the age of 14 should be able to be incarcerated has increased since 2022 (16% in 2022, 31% in 2023).

Figure 3.10.2: Opinion on whether children under 14 years should be able to be incarcerated 2022–2023 trends

↑↓ indicates a significant increase or decrease from the previous wave at at least the 95% confidence level.

3.10.3 Sub-group differences (2023)

Respondents working in government were more likely than those from non-government organisations to consider that children aged under 14 years should be able to be incarcerated (37% government, 24% non-government).

Respondents working in the South West and Far North Queensland DCSSDS regions were more likely than respondents from other regions to agree that children aged under 14 years should be able to be incarcerated (43% South West, 44% Far North QLD) especially in comparison to the South East region (20%).

Respondents with 10 or more years' experience working in their sector were more likely than those who have been in the sector less than 10 years to believe that children aged under 14 years should be able to be incarcerated (37% 10+ yrs, 28% <10 yrs).

Those working in the child protection sector (32%) were more likely than those in the youth justice sector (18%) to consider that children aged under 14 years should be able to be incarcerated.

Those who identify as an Aboriginal and/or Torres Strait Islander person (19%) were less likely than those who do not identify as such (33%) to believe that children aged under 14 years should be able to be incarcerated.

Other sub-group differences are outlined in Tables 3.10.1 and 3.10.2.

Table 3.10.1: Opinion on whether children under 14 years should be able to be incarcerated by organisation type, region and years in sector (2023)

Q92 In your opinion, what is the minimum age a child should be incarcerated?

3.10.4 2023 result

63% of respondents considered that the minimum incarceration age should be 14 years or older. An additional, 23% of respondents considered that the minimum incarceration age could be either 12 years (18%) or 13 years (5%). Only 1% of respondents supported incarceration for a child under the age of 10.

Figure 3.10.3: Opinion on minimum incarceration age (2023)

3.10.5 Comparison to previous survey data (2022–2023)

In 2023, consideration as to the minimum age that children could be incarcerated was lower than reported in 2022. In 2023, 63% reported that 14 years or more would be an appropriate minimum age while this threshold was relevant to 76% of respondents in 2022.

Figure 3.10.4: Opinion on whether children under 14 years should be able to be incarcerated 2022–2023 trends

3.10.6 Sub-group differences (2023)

Respondents working in non-government organisations were more likely to state that the minimum age of incarceration should be 12 years or older (90% non-government, 82% government) including 19% non-government respondents who indicated the minimum age should be 18 years old.

Those who have worked in the sector for less than 10 years were more likely than those with more experience to suggest that the minimum age of incarceration should be 12 years or older (90% <10yrs experience, 79% 10+yrs experience); with respondents who have worked in the sector longer having a greater propensity to considering those aged 10 years could also be incarcerated if needed (16% 10+yrs experience, 8% <10yrs experience).

Far North Queensland DCSSDS respondents were more likely than respondents working in other regions to be open to considering younger minimum ages for incarceration (24% considered that the minimum age could be 10 years, 11% average).

Other sub-group differences are outlined in Tables 3.10.3 and 3.10.4.

New question in 2023

Q95 In your opinion, how strongly do you agree or disagree that the increasing cost of living is having a negative impact on children, young people and their families?

3.10.7 2023 result

A total of 94% of respondents agreed (22%) or strongly agreed (71%) that the increased cost of living is having a negative impact on children, young people and their families. Small proportions of respondents were neutral (3%) or disagreed (3%) with this statement.

Figure 3.10.5: Impact of cost of living on children, young people and their families (2023)

3.10.8 Sub-group differences (2023)

Respondents working in the Far North Queensland DCSSDS region were less likely than those from other regions to agree or strongly agree that the increasing cost of living is having a negative impact on children, young people and their families (84% Far North QLD, 94% average). However, the majority still considered this to be the case.

Other sub-group differences are outlined in Tables 3.10.5 and 3.10.6.

Blue↑/Red↓ figures and arrows indicate the result is significantly higher/lower compared with others within that sub-group (e.g. region) at at least the 95% confidence level

Base: All respondents electing/able to answer

4. Appendices

Appendix A – 2023 Statutory systems workforce survey

The Queensland Family and Child Commission (QFCC) has a legislative responsibility to evaluate, at a systemic level, monitor and report on the performance of, Queensland statutory systems (child protection and youth justice). One of the ways we meet this responsibility is by conducting an annual workforce survey, which also supports ongoing monitoring of the statutory systems.

This survey will collect information about the experiences of frontline staff and service providers who work within the Queensland statutory systems (child protection and youth justice). This information will contribute to reporting products and performance of the QFCC's functions, with results shared so the sector can also benefit from information about key issues.

Participation will involve completing an online survey that will take approximately 20-30 minutes of your time. The survey includes questions with fixed and free text response options. The survey covers a variety of topics, including (but not limited to) system performance, how you are supported to perform and develop in your role, cultural capability, how you work with clients and children's rights. You are free to skip any questions you do not wish to answer.

Your responses will be collated with those of other respondents so you will not be identifiable in our reporting. Completion of this online survey will be taken to indicate informed consent to participate.

The following questions are being asked so we can describe the sample of people who responded to our survey

No.	Item	Response scale
	What is your workplace postcode?	
Q12.	<i>Exit message if not a Queensland postcode:</i> Thank you for your interest in completing this survey. We are interested in the views of staff who work in Queensland.	Free text (4 numerical spaces)
Q96.	Do you work mainly with:	<input type="checkbox"/> a) Children and young people and their families in contact with the child protection and family support system <input type="checkbox"/> b) Children and young people in contact with the youth justice system <input type="checkbox"/> c) other – please specify (Free text)
Q13.	Is your workplace a government or non-government organisation?	<input type="checkbox"/> Government <input type="checkbox"/> Non-government
Q51.	<i>Only ask if 'yes' to a or c above and 'Government' at Q13:</i> Do you work in a Child Safety Service Centre or Regional Intake Service?	<input type="checkbox"/> Yes <input type="checkbox"/> No
Q97.	<i>Only ask if 'yes' b and Government at Q13:</i> Do you work in a Youth Justice Service Centre or Youth Detention Centre?	<input type="checkbox"/> Yes <input type="checkbox"/> No
Q52.	<i>Only ask if 'yes to a or c and Non-government' at Q13:</i> a) Do you work for an Aboriginal and Torres Strait Islander community-controlled organisation? b) Do you work for a Family and Child Connect Service? c) Do you work for an Intensive Family Support service? d) Do you work for a Family Wellbeing Service?	<input type="checkbox"/> Yes <input type="checkbox"/> No
Q52a.	<i>Only ask if 'yes to b and Non-Government at Q13:</i> a) Do you work for an Aboriginal and Torres Strait Islander community-controlled organisation?	<input type="checkbox"/> Yes <input type="checkbox"/> No
Q53.	Do you work with children and young people living in out-of-home care?	<input type="checkbox"/> Yes <input type="checkbox"/> No
Q7.	At which level do you work in your organisation?	<input type="checkbox"/> No supervisory responsibilities <input type="checkbox"/> Mid-level manager <input type="checkbox"/> Senior manager/executive
Q10.	In your role, which of the following best describes the main service/s you provide to children, young people and their families?	<input type="checkbox"/> Child protection – tertiary services <input type="checkbox"/> Child protection – secondary services <input type="checkbox"/> Youth justice services – detention centre or service centre <input type="checkbox"/> Youth justice services – community based <input type="checkbox"/> Counselling and other mental health services <input type="checkbox"/> Drug and alcohol services <input type="checkbox"/> Domestic and family violence services <input type="checkbox"/> Disability services <input type="checkbox"/> Educational/schools/early education <input type="checkbox"/> Health and hospitals <input type="checkbox"/> Other _____ Free text

No.	Item	Response scale
Q1.	How long have you worked in one of the statutory systems (child protection or youth justice)?	<input type="checkbox"/> Less than 1 year <input type="checkbox"/> 1–2 years <input type="checkbox"/> 3–5 years <input type="checkbox"/> 6–9 years <input type="checkbox"/> 10–14 years <input type="checkbox"/> 15–19 years <input type="checkbox"/> 20+ years
Q31.	How would you describe your experience in relevant statutory system (child protection or youth justice)?	<input type="checkbox"/> I have only worked in government agencies <input type="checkbox"/> I have mostly worked in government agencies <input type="checkbox"/> I have fairly equal experience in government agencies and non-government organisations <input type="checkbox"/> I have mostly worked in non-government organisations <input type="checkbox"/> I have only worked in non-government organisations
Q8.	What is your highest level of tertiary qualification relevant to your role?	<input type="checkbox"/> No tertiary qualification <input type="checkbox"/> Cert II <input type="checkbox"/> Cert III <input type="checkbox"/> Cert IV <input type="checkbox"/> Diploma <input type="checkbox"/> Advanced Diploma <input type="checkbox"/> Bachelor <input type="checkbox"/> Graduate Certificate/Diploma <input type="checkbox"/> Masters <input type="checkbox"/> PhD/Professional Doctorate
Q9.	Do you identify as an Aboriginal and/or Torres Strait Islander person?	<input type="checkbox"/> Aboriginal person <input type="checkbox"/> Torres Strait Islander person <input type="checkbox"/> Both <input type="checkbox"/> No
Q54.	Are you from a culturally and linguistically diverse background?	<input type="checkbox"/> Yes <input type="checkbox"/> No
Q5.	I would recommend working in the relevant statutory system (child protection or youth justice) to others	<input type="checkbox"/> Strongly disagree <input type="checkbox"/> Disagree <input type="checkbox"/> Neutral <input type="checkbox"/> Agree <input type="checkbox"/> Strongly agree
Q32.	I intend to leave sector within the next 12 months	<input type="checkbox"/> Strongly disagree <input type="checkbox"/> Disagree <input type="checkbox"/> Neutral <input type="checkbox"/> Agree <input type="checkbox"/> Strongly agree

The following questions ask your views about the statutory systems (child protection or youth justice) as a whole.

No.	Item	Response scale
Q26b.	The child protection and family support system meets the needs of children, young people and families	<input type="checkbox"/> Strongly disagree <input type="checkbox"/> Disagree <input type="checkbox"/> Neutral <input type="checkbox"/> Agree <input type="checkbox"/> Strongly agree
Q26h.	The youth justice system meets the needs of young people, families and the community	<input type="checkbox"/> Strongly disagree <input type="checkbox"/> Disagree <input type="checkbox"/> Neutral <input type="checkbox"/> Agree <input type="checkbox"/> Strongly agree
Q26c.	The statutory system I work in (child protection or youth justice) is built on shared connections and commitment	<input type="checkbox"/> Strongly disagree <input type="checkbox"/> Disagree <input type="checkbox"/> Neutral <input type="checkbox"/> Agree <input type="checkbox"/> Strongly agree
Q26e.	The community actually has confidence in the child protection and family support system	<input type="checkbox"/> Strongly disagree <input type="checkbox"/> Disagree <input type="checkbox"/> Neutral <input type="checkbox"/> Agree <input type="checkbox"/> Strongly agree
Q26i.	The community should have confidence in the child protection and family support system	<input type="checkbox"/> Strongly disagree <input type="checkbox"/> Disagree <input type="checkbox"/> Neutral <input type="checkbox"/> Agree <input type="checkbox"/> Strongly agree
Q26j.	The community actually has confidence in the youth justice system	<input type="checkbox"/> Strongly disagree <input type="checkbox"/> Disagree <input type="checkbox"/> Neutral <input type="checkbox"/> Agree <input type="checkbox"/> Strongly agree
Q26k.	The community should have confidence in the youth justice system	<input type="checkbox"/> Strongly disagree <input type="checkbox"/> Disagree <input type="checkbox"/> Neutral <input type="checkbox"/> Agree <input type="checkbox"/> Strongly agree
Q26f.	There is sufficient capacity within the secondary support service system I work in (child protection or youth justice) to meet demand	<input type="checkbox"/> Strongly disagree <input type="checkbox"/> Disagree <input type="checkbox"/> Neutral <input type="checkbox"/> Agree <input type="checkbox"/> Strongly agree
Q26g.	There is sufficient capacity within the tertiary support system I work in (child protection or youth justice) system to meet demand	<input type="checkbox"/> Strongly disagree <input type="checkbox"/> Disagree <input type="checkbox"/> Neutral <input type="checkbox"/> Agree <input type="checkbox"/> Strongly agree
Q57.	Family support referrals and child protection reports are likely to increase in the next 12 months	<input type="checkbox"/> Strongly disagree <input type="checkbox"/> Disagree <input type="checkbox"/> Neutral <input type="checkbox"/> Agree <input type="checkbox"/> Strongly agree

No.	Item	Response scale
Q57a.	Family support referrals and children and young people under youth justice supervision are likely to increase in the next 12 months	<input type="checkbox"/> Strongly disagree <input type="checkbox"/> Disagree <input type="checkbox"/> Neutral <input type="checkbox"/> Agree <input type="checkbox"/> Strongly agree
Q33.	How much do you agree or disagree with the following? a) The introduction of Family and Child Connect has resulted in families being more appropriately referred to the secondary or tertiary system b) The introduction of Intensive Family Support and Family Wellbeing Services has resulted in: i. improved access to early intervention services for children, young people and families ii. a reduction in demand (i.e. less children entering the child protection system) iii. improved outcomes for children, young people and families iv. improved ability of families to care for their children	<input type="checkbox"/> Strongly disagree <input type="checkbox"/> Disagree <input type="checkbox"/> Neutral <input type="checkbox"/> Agree <input type="checkbox"/> Strongly agree

The following questions ask about your role and professional development

No.	Item	Response scale
Q15a.	I have a clear understanding of my role and responsibilities	<input type="checkbox"/> Strongly disagree <input type="checkbox"/> Disagree <input type="checkbox"/> Neutral <input type="checkbox"/> Agree <input type="checkbox"/> Strongly agree
Q15b.	I consider my caseload/workload to be manageable	<input type="checkbox"/> Strongly disagree <input type="checkbox"/> Disagree <input type="checkbox"/> Neutral <input type="checkbox"/> Agree <input type="checkbox"/> Strongly agree
Q15g.	Risk assessment in holding higher than manageable caseload/workload is undertaken adequately	<input type="checkbox"/> Strongly disagree <input type="checkbox"/> Disagree <input type="checkbox"/> Neutral <input type="checkbox"/> Agree <input type="checkbox"/> Strongly agree
Q15c.	I am able to spend enough time with children, young people and their families to do my job well	<input type="checkbox"/> Strongly disagree <input type="checkbox"/> Disagree <input type="checkbox"/> Neutral <input type="checkbox"/> Agree <input type="checkbox"/> Strongly agree
Q15e.	I receive support from my colleagues/peers to do my job well	<input type="checkbox"/> Strongly disagree <input type="checkbox"/> Disagree <input type="checkbox"/> Neutral <input type="checkbox"/> Agree <input type="checkbox"/> Strongly agree
Q15d.	I receive the right amount of professional practice supervision to do my job well	<input type="checkbox"/> Strongly disagree <input type="checkbox"/> Disagree <input type="checkbox"/> Neutral <input type="checkbox"/> Agree <input type="checkbox"/> Strongly agree

No.	Item	Response scale
Q60.	Where do you receive your professional practice supervision?	<input type="checkbox"/> My team leader/manager <input type="checkbox"/> Another person in my organisation <input type="checkbox"/> An external person my organisation pays for <input type="checkbox"/> An external person I pay <input type="checkbox"/> Other (please specify)
Q61.	How would you prefer to receive your professional practice supervision?	<input type="checkbox"/> From my team leader/manager <input type="checkbox"/> From another person in my organisation <input type="checkbox"/> From an external person my organisation pays for <input type="checkbox"/> From an external person I pay
Q16a.	I have been provided with enough training and other learning opportunities to undertake my role well	<input type="checkbox"/> Strongly disagree <input type="checkbox"/> Disagree <input type="checkbox"/> Neutral <input type="checkbox"/> Agree <input type="checkbox"/> Strongly agree
Q16f.	In your opinion, what are the highest learning and development priorities for the child protection and family support workforce?	Free text
Q98.	In your opinion, what are the highest learning and development priorities for the youth justice workforce?	Free text
Q62.	How much do you agree or disagree with the following statements? a) I am aware of the impact of trauma on brain development b) I keep up with the latest evidence about child and adolescent brain development c) Mandatory training in neuroscience would improve the practice of frontline workers in the child protection and family support sector	<input type="checkbox"/> Strongly disagree <input type="checkbox"/> Disagree <input type="checkbox"/> Neutral <input type="checkbox"/> Agree <input type="checkbox"/> Strongly agree
Q63.	My organisation supports staff to manage work stress and maximise our health and wellbeing	<input type="checkbox"/> Strongly disagree <input type="checkbox"/> Disagree <input type="checkbox"/> Neutral <input type="checkbox"/> Agree <input type="checkbox"/> Strongly agree
Q64.	The work I do: a) serves an important purpose b) leads to positive change c) gives me a sense of satisfaction	<input type="checkbox"/> Strongly disagree <input type="checkbox"/> Disagree <input type="checkbox"/> Neutral <input type="checkbox"/> Agree <input type="checkbox"/> Strongly agree

The following questions ask about how you work with clients

No.	Item	Response scale
Q20b.	My workplace has a culture that supports collaboration with other organisations to achieve client outcomes	<input type="checkbox"/> Strongly disagree <input type="checkbox"/> Disagree <input type="checkbox"/> Neutral <input type="checkbox"/> Agree <input type="checkbox"/> Strongly agree
Q20e.	I have enough time in my role to build relationships with other organisations/service providers	<input type="checkbox"/> Strongly disagree <input type="checkbox"/> Disagree <input type="checkbox"/> Neutral <input type="checkbox"/> Agree <input type="checkbox"/> Strongly agree
Q66.	How do you collaborate with services that are also working with the children, young people or their families you are working with?	Free text
Q21b.	In my organisation, children, young people and their families have the opportunity to participate in decisions affecting their lives	<input type="checkbox"/> Strongly disagree <input type="checkbox"/> Disagree <input type="checkbox"/> Neutral <input type="checkbox"/> Agree <input type="checkbox"/> Strongly agree
Q37a.	My organisation is a Child Safe Organisation (i.e. creates a culture, adopts strategies and takes action to promote child wellbeing and prevent harm to children and young people)	<input type="checkbox"/> Strongly disagree <input type="checkbox"/> Disagree <input type="checkbox"/> Neutral <input type="checkbox"/> Agree <input type="checkbox"/> Strongly agree
Q69.	Children and young people attending my organisation: a) feel cared for and welcome b) feel safe	<input type="checkbox"/> Strongly disagree <input type="checkbox"/> Disagree <input type="checkbox"/> Neutral <input type="checkbox"/> Agree <input type="checkbox"/> Strongly agree
Q70.	Children and young people attending my organisation: a) have access to the documents they need (such as identity documents) for accessing support and other services b) can access health services when they need them c) can access mental health services when they need them d) receive sufficient support to access early childhood education and care e) receive sufficient support to attend school	<input type="checkbox"/> Strongly disagree <input type="checkbox"/> Disagree <input type="checkbox"/> Neutral <input type="checkbox"/> Agree <input type="checkbox"/> Strongly agree <input type="checkbox"/> Not applicable to my work
Q71.	Aboriginal and Torres Strait Islander children and young people attending my organisation: a) are supported to preserve their cultural and linguistic identity b) are supported to stay connected with their communities	<input type="checkbox"/> Strongly disagree <input type="checkbox"/> Disagree <input type="checkbox"/> Neutral <input type="checkbox"/> Agree <input type="checkbox"/> Strongly agree <input type="checkbox"/> Not applicable to my work
Q72.	Culturally and linguistically diverse children and young people attending my organisation: a) are supported to preserve their cultural and linguistic identity b) are supported to stay connected with their communities	<input type="checkbox"/> Strongly disagree <input type="checkbox"/> Disagree <input type="checkbox"/> Neutral <input type="checkbox"/> Agree <input type="checkbox"/> Strongly agree <input type="checkbox"/> Not applicable to my work
Q73.	Children and young people attending my organisation who have a disability can access appropriate support	<input type="checkbox"/> Strongly disagree <input type="checkbox"/> Disagree <input type="checkbox"/> Neutral <input type="checkbox"/> Agree <input type="checkbox"/> Strongly agree <input type="checkbox"/> Not applicable to my work

No.	Item	Response scale
Q74.	Children, young people and their families attending my organisation are provided with sufficient support and opportunities to keep their children at home where appropriate	<input type="checkbox"/> Strongly disagree <input type="checkbox"/> Disagree <input type="checkbox"/> Neutral <input type="checkbox"/> Agree <input type="checkbox"/> Strongly agree <input type="checkbox"/> Not applicable to my work
Q74A.	The children and young people attending my organisation are provided with sufficient support and linked to services to reduce recidivism	<input type="checkbox"/> Strongly disagree <input type="checkbox"/> Disagree <input type="checkbox"/> Neutral <input type="checkbox"/> Agree <input type="checkbox"/> Strongly agree <input type="checkbox"/> Not applicable to my work
Q75.	Young people attending my organisation who are making the transition from out-of-home care to independent living can access appropriate transition services when they need them	<input type="checkbox"/> Strongly disagree <input type="checkbox"/> Disagree <input type="checkbox"/> Neutral <input type="checkbox"/> Agree <input type="checkbox"/> Strongly agree <input type="checkbox"/> Not applicable to my work
Q75A.	Young people on statutory community orders have a plan in place for when they transition out of the youth justice system	<input type="checkbox"/> Strongly disagree <input type="checkbox"/> Disagree <input type="checkbox"/> Neutral <input type="checkbox"/> Agree <input type="checkbox"/> Strongly agree <input type="checkbox"/> Not applicable to my work
Q76.	I am aware of the inherent and unconscious bias that can impact my work with children, young people and their families	<input type="checkbox"/> Strongly disagree <input type="checkbox"/> Disagree <input type="checkbox"/> Neutral <input type="checkbox"/> Agree <input type="checkbox"/> Strongly agree

The following questions ask about children's rights

No.	Item	Response scale
Q78.	I have a good working understanding of the United Nations <i>Convention on the Rights of the Child</i>	<input type="checkbox"/> Strongly disagree <input type="checkbox"/> Disagree <input type="checkbox"/> Neutral <input type="checkbox"/> Agree <input type="checkbox"/> Strongly agree
Q79.	Within my organisation: a) children are supported to survive and develop in the best way possible b) decisions are made in children's and young people's best interests c) the views of children and young people are listened to and valued d) children and young people are not discriminated against	<input type="checkbox"/> Strongly disagree <input type="checkbox"/> Disagree <input type="checkbox"/> Neutral <input type="checkbox"/> Agree <input type="checkbox"/> Strongly agree
Q84.	In my community, children and young people: a) are protected from abuse and neglect b) are supported to live safely at home with their families c) live in safe communities d) can access the services they need to stay healthy, such as GPs and hospitals e) can access the services they need for healthy teeth, such as dentists f) can access mental health services if needed g) can access disability services if needed h) can access NDIS supports if needed i) can access early childhood education and care, such as kindergarten j) have support to stay engaged in learning at school or TAFE k) can access sporting, recreational or community activities l) are supported to connect with their culture (for Aboriginal and Torres Strait Islander children and young people)	<input type="checkbox"/> Strongly disagree <input type="checkbox"/> Disagree <input type="checkbox"/> Neutral <input type="checkbox"/> Agree <input type="checkbox"/> Strongly agree

The following questions ask about cultural capability

No.	Item	Response scale
Q23c.	I understand how the Aboriginal and Torres Strait Islander Child Placement Principle applies to my role	<input type="checkbox"/> Strongly disagree <input type="checkbox"/> Disagree <input type="checkbox"/> Neutral <input type="checkbox"/> Agree <input type="checkbox"/> Strongly agree <input type="checkbox"/> Not applicable to my work
Q22e.	My organisation partners with Aboriginal and Torres Strait Islander organisations to support the delivery of services to Aboriginal and Torres Strait Islander children, young people, their families and communities	<input type="checkbox"/> Strongly disagree <input type="checkbox"/> Disagree <input type="checkbox"/> Neutral <input type="checkbox"/> Agree <input type="checkbox"/> Strongly agree
Q89.	Delegated authority will result in better outcomes for Aboriginal and Torres Strait Islander children, young people and their families	<input type="checkbox"/> Strongly disagree <input type="checkbox"/> Disagree <input type="checkbox"/> Neutral <input type="checkbox"/> Agree <input type="checkbox"/> Strongly agree <input type="checkbox"/> Not applicable to my work

The following questions ask about policy issues

No.	Item	Response scale
Q39.	In your opinion, what could be done to improve the child protection and family support system?	Free text
Q94.	In your opinion, what could be done to improve the youth justice system?	Free text
Q91.	Do you believe that children under the age of 14 should be incarcerated (that is, held in a police watchhouse or placed in youth detention)?	<input type="checkbox"/> Yes <input type="checkbox"/> No <input type="checkbox"/> Don't know
Q92.	In your opinion, what is the minimum age a child should be incarcerated?	<input type="checkbox"/> Less than 8 <input type="checkbox"/> 8 <input type="checkbox"/> 9 <input type="checkbox"/> 10 <input type="checkbox"/> 11 <input type="checkbox"/> 12 <input type="checkbox"/> 13 <input type="checkbox"/> 14 <input type="checkbox"/> 15 <input type="checkbox"/> 16 <input type="checkbox"/> 17 <input type="checkbox"/> 18
Q95.	In your opinion, how strongly do you agree or disagree that the increasing cost of living is having a negative impact on children, young people and their families	<input type="checkbox"/> Strongly disagree <input type="checkbox"/> Disagree <input type="checkbox"/> Neutral <input type="checkbox"/> Agree <input type="checkbox"/> Strongly agree

No.	Item	Response scale
Q29a.	How did you hear about this survey?	<input type="checkbox"/> Email from QFCC <input type="checkbox"/> Employer <input type="checkbox"/> Colleague <input type="checkbox"/> Peak body <input type="checkbox"/> Newsletter <input type="checkbox"/> Other (please specify)

Jump to separate survey (so responses cannot be linked)

Item	Response scale
Thank you for taking the time to complete our survey. If you would like to receive information about the survey results, or future surveys, please enter your email address. Email addresses cannot be linked to survey responses.	Free text
From time to time, the Queensland Family and Child Commission conducts interviews and focus groups with service providers and stakeholders across the sector to understand how the Queensland statutory systems (child protection and youth justice) are performing and identify opportunities for continuous improvement. If you would like to receive information about participating in these studies, please enter your email address. Email addresses cannot be linked to survey responses.	Free text

Closing message:

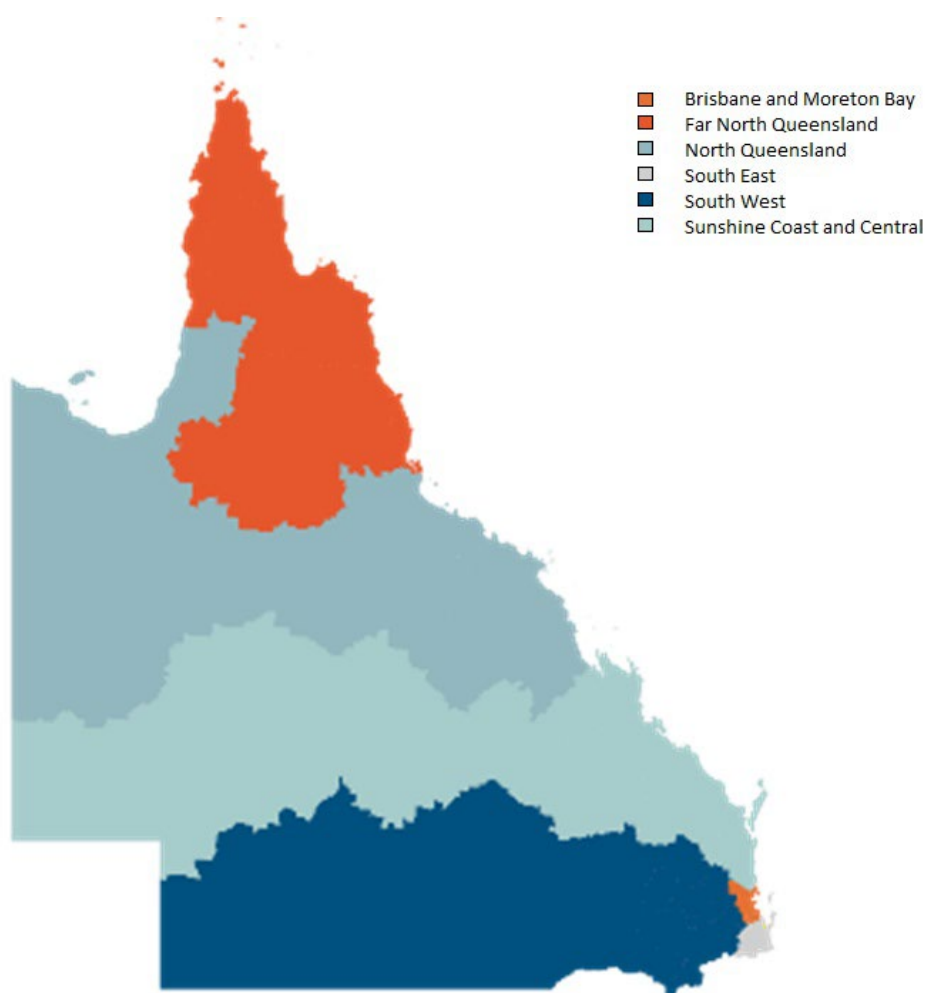

We understand your time is limited and appreciate that you have prioritised completing this survey. We expect survey results to be published on the QFCC website by the end of 2023. To get in touch with us, please email evaluation@qfcc.qld.gov.au

Appendix B – Regional Boundaries

Throughout the tables in this report, the data has been reported on a regional basis, with these six regions being:

1. Brisbane and Moreton Bay
2. Far North Queensland
3. North Queensland
4. South East
5. South West
6. Sunshine Coast and Central

Appendix C – Sampling error chart

All sample surveys and polls, whether or not they use probability sampling, are subject to multiple sources of error which are most often not possible to quantify or estimate, including sampling error, coverage error, error associated with non-response, error associated with question wording and response options and post survey weighting and adjustments. Therefore, MCR avoids the words 'margin of error' as they are not able to be verified. All that can be calculated are different possible sampling errors with different probabilities of pure, unweighted, random samples with 100% response rates. These are only theoretical because no published surveys come close to this ideal. At the absolute minimum, sampling error based on various cell sizes for this survey could fall within the following ranges (at the 95% confidence level).

Sample size	10/90	20/80	30/70	40/60	50/50
100	±6.0	±8.0	±9.2	±9.8	±10.0
200	±4.2	±5.6	±6.5	±6.9	±7.0
300	±3.5	±4.6	±5.3	±5.7	±5.8
400	±3.0	±4.0	±4.6	±4.9	±5.0
500	±2.7	±3.6	±4.1	±4.4	±4.5
600	±2.4	±3.3	±3.7	±4.0	±4.1
700	±2.3	±3.0	±3.5	±3.7	±3.8
800	±2.1	±2.8	±3.2	±3.5	±3.5
900	±2.0	±2.4	±3.1	±3.3	±3.3
1000	±1.9	±2.5	±2.9	±3.1	±3.2
1100	±1.8	±2.4	±2.7	±2.9	±3.0
1200	±1.7	±2.3	±2.6	±2.8	±2.8
1300	±1.6	±2.2	±2.5	±2.7	±2.7
1400	±1.6	±2.1	±2.4	±2.6	±2.6
1500	±1.5	±2.0	±2.3	±2.5	±2.5
1600	±1.5	±2.0	±2.3	±2.4	±2.5
1700	±1.4	±1.9	±2.2	±2.3	±2.4
1800	±1.4	±1.9	±2.1	±2.3	±2.3
1900	±1.4	±1.8	±2.1	±2.2	±2.3
2000	±1.3	±1.8	±2.0	±2.2	±2.2
2100	±1.3	±1.7	±2.0	±2.1	±2.1
2200	±1.3	±1.7	±1.9	±2.1	±2.1
2300	±1.2	±1.6	±1.9	±2.0	±2.0
2400	±1.2	±1.6	±1.8	±2.0	±2.0
2500	±1.2	±1.6	±1.8	±1.9	±2.0
