## Strengthening our sector strategy

## Staying connected

This action plan sets the foundations for the strategy. To achieve success there must be participation and a sense of ownership from across our sector.

Actions under the first action plan will be coordinated by the QFCC. Leadership for each priority area will be determined in consultation with key stakeholders including peak and industry bodies, non-government organisations and Queensland Government agencies.

## Making it happen

This first action plan focuses on building foundations to strengthen the capacity and capability of the child and family support sector and establish a positive culture in the way we work to support children and families. The priority action areas include:

- harnessing pathways for entry to our sector
- supporting whole of community participation to identify local priorities and solutions
- strengthening systemic supports for our workforce
- building shared knowledge and capacity across our sector, and
- creating an environment for organisations to flourish.

It is anticipated that as the priorities under the first action plan are implemented, some changes may be required to respond to sector and community feedback. The QFCC will work with sector partners to share the responsibility for the realisation of initiatives and actions under the plan.
